Cameroon cable tray support models

Overview

We supply a full range of products including cable trays, cable ladders, wire mesh trays, trunking systems, and accessories — all manufactured to meet international safety and quality standards.

Key Takeaways

Cameroon offers a wide range of cable tray support models including ladder trays, perforated trays, wire mesh trays, and trunking systems, supported by wall brackets, suspension brackets, hangers, and Strut rails.

Types of Cable Trays

Ladder Cable Trays: Ideal for heavy-duty applications, these trays provide strong support for large bundles of cables and allow excellent ventilation to prevent overheating. Perforated Cable Trays: These trays have holes along the base to improve airflow, reduce heat buildup, and facilitate cable management. Wire Mesh Trays (Cablofil): Flexible and lightweight, wire mesh trays allow easy inspection, maintenance, and quick installation.

They are often used in data centers and telecom infrastructure. Trunking Systems: Enclosed trays that protect cables from dust, moisture, and mechanical damage, suitable for sensitive or high-voltage installations.

Support Models and Accessories

Cable trays in Cameroon are supported using a variety of systems to ensure stability and compliance with safety standards: Wall Brackets: Fixed to walls for horizontal or vertical tray runs. Suspension Brackets and Hangers: Used for ceiling or overhead installations, providing adjustable height and spacing. Strut Rails: Modular support rails that allow flexible mounting and easy integration of multiple trays.

Flanged or Normal Edges: Options for tray edges to enhance load capacity and safety.

Quick-

Fix Systems: Some models, like Cablofil, offer tool-less accessories (Faslock) for bends and direction changes on-site.

Materials and Finishes

Cable trays are manufactured from galvanized steel, stainless steel, aluminum, and fiberglass, offering resistance to corrosion, heat, and harsh weather conditions. Surface treatments include hot-dip galvanization and electrostatic epoxy paint, suitable for both indoor and outdoor applications.

Applications

These cable tray systems are widely used in: Construction & Real Estate: Office buildings, housing projects, and commercial centers. Energy & Utilities: Power plants, substations, and renewable energy projects. Telecommunications & ICT: Data centers, telecom towers, and broadband infrastructure.

Government & Institutional Facilities: Hospitals, schools, and public offices. Suppliers in CameroonNed-Tech: Offers a full range of cable trays and accessories with fast delivery across major cities. Brilltech Engineers Pvt.

Ltd.: Provides galvanized, ladder, and perforated trays with custom options. Legrand (Cablofil): Specializes in wire mesh trays with flexible support systems and quick-fix accessories. Memico: Supplies tailored cable support solutions with corrosion-resistant finishes and standard or custom dimensions.

These suppliers provide technical support for sizing, selection, and installation guidance, ensuring compliance with international standards and efficient cable management.
