Custom Fiber Optic Cable Supplier

Overview

Custom Fiber Optic Cables | FOS Inon Fiber OpticsOur custom fiber optic solutions are developed and manufactured with the highest precision at our faciliti.

Key Takeaways

FOS Inon Fiber Optics, Cables Unlimited, and Fiber Cables Direct are leading manufacturers offering fully customized fiber optic cable solutions for industrial, medical, and specialized applications.

FO

S Inon Fiber OpticsFOS Inon, based in Germany, specializes in custom fiber optic assemblies for medical technology, spectroscopy, industrial automation, and laser applications. They offer a wide range of fiber types including fused silica, borosilicate, PMMA, and Silica-Hard-Clad, each suited for specific conditions such as high temperatures, chemical resistance, or high light transmittance. Their assemblies integrate precision optics and mechanical components, undergo rigorous ISO 9001: 2015 quality controls, and are designed for long service life and reproducible performance.

They also provide custom connectors and support from feasibility studies to validated series production (FOS Inon Fiber Optics),.

Cables Unlimited

Cables Unlimited, a U. S.-based manufacturer, provides custom fiber optic cable assemblies, hybrid cables, and wire harnesses for industries including aerospace, defense, medical, robotics, and communications. They support OM1–OM5 multimode, OS1/OS2 singlemode, bend-insensitive, and polarization-maintaining fibers, with connectors such as LC, SC, FC, MTP/MPO, TFOCA, ST, and hybrid/military types.

Their services include engineering assistance, rapid prototyping, and low-to-high volume manufacturing, ensuring cables are tested for rugged environments and tailored to specific applications (Cables Unlimited),.

Fiber Cables Direct

Fiber Cables Direct offers a custom cable configurator allowing clients to specify fiber count, length, jacket type, connector style, and modality. Options include indoor/outdoor, armored, aerial, tactical, zip cord, and tight-buffered jackets, with multimode and singlemode fibers. They provide a lifetime warranty and emphasize robust, reliable assemblies suitable for industrial and commercial applications (Fiber Cables Direct),.

Key Considerations for Custom Fiber Optic Cables

Fiber Type: Choose based on light transmission, temperature tolerance, and mechanical durability. Connector Type: Standard or custom connectors for seamless integration with equipment. Jacket Material: Options like PVC, silicone, or stainless steel for environmental protection.

Application Requirements: Consider vibration, moisture, EMI, or medical biocompatibility. Engineering Support: Manufacturers often provide design assistance, prototyping, and testing to ensure performance. These manufacturers provide end-to-end solutions, from design consultation to production, ensuring that custom fiber optic cables meet precise technical and environmental requirements.
