How much does galvanized cable tray cost in Finland

Overview

Galvanised Cable Tray In FinlandGalvanised Cable Tray is often a cost-effective solution compared to other materials. It is relatively affordable, especial.

Key Takeaways

Galvanized cable trays in Finland typically cost between €20 and €50 per meter, depending on type, size, and supplier.

Price Overview

The cost of galvanized cable trays varies based on tray type (ladder, perforated, or wire mesh), length, width, and load capacity. Standard hot-dip galvanized ladder trays, commonly used in industrial and commercial installations, are usually priced around €20–€50 per meter. Fittings such as bends, tees, and reducers are sold separately, often ranging from €5 to €25 per piece depending on size and complexity.

Wire mesh galvanized trays are generally more cost-effective due to lower material usage and easier installation, while ladder trays offer higher load capacity and durability. Prices may also vary depending on whether the supplier offers custom sizes or pre-fabricated modular systems.

Suppliers and Purchasing

In Finland, several suppliers provide galvanized cable trays, including Onninen, Brilltech Engineers, and other local distributors. Most suppliers require you to request a quote to get exact pricing, as costs can fluctuate based on order volume, delivery location, and additional services like installation support.

Additional Considerations

Durability: Galvanized trays resist corrosion, making them suitable for long-term use in industrial and outdoor environments. Installation: Many trays are designed for quick assembly, reducing labor costs. Sustainability: Steel trays are recyclable, contributing to environmentally friendly construction practices.

For precise pricing, it is recommended to contact suppliers directly with your project specifications, including tray type, length, width, and required fittings, to obtain a tailored quote.
