How much does a Huawei low-voltage network cabinet cost

Overview

How much does a Huawei low-voltage network cabinet costA practical, no-fluff guide to selecting, installing, and maintaining the Huawei APM30H outdoor cabi.

Key Takeaways

Huawei low-voltage network cabinets typically range from around US$890 to US$1,350 depending on model, features, and deployment requirements. Price Range and ModelsAPM30H Outdoor Cabinet: A basic version costs approximately US$890–$950, offering simpler maintenance and lower upfront cost, but may have higher long-term fan failure risk in dusty environments. The upgraded Ver.

E model, with dual-plate heat exchangers and sealed air loops, costs around US$1,100–$1,350, providing longer mean time between failures and better thermal stability in harsh climates. M50 Outdoor Cabinet: Designed for rapid FTTH deployment, this compact and lightweight cabinet supports 1–2U small equipment and flexible installation on poles or walls. While exact pricing is not publicly listed, it is positioned as a low-cost solution for network expansion, emphasizing ease of deployment and minimal secondary integration.

Factors Affecting Cost

© 2026 BAGYOU FIBRE NETWORKS · All rights reserved

Model and Capacity: Larger cabinets or those supporting more equipment (e.g., multiple subracks or high-capacity ODFs) are more expensive. Power and Voltage Compatibility: Cabinets supporting both AC and DC power, or higher voltage ranges, may increase the price. Environmental Features: Outdoor cabinets with IP55 sealing, high-efficiency heat exchangers, or corrosion-resistant materials cost more due to enhanced durability.

Customization and Installation: Additional features, such as integrated PDUs, ODFs, or specialized cooling systems, and professional installation services can significantly add to the total expenditure.

Summary

For a standard Huawei low-voltage network cabinet, expect to pay roughly US$890–$1,350 for typical outdoor models like the APM30H, with costs increasing for enhanced thermal management, higher capacity, or additional features. The M50 cabinet offers a cost-effective, compact alternative for rapid deployment, particularly in FTTH or mobile site upgrades. Buyers should also consider installation and regional logistics, which can influence the final price.
