How to tie the pigtail straps

Overview

Before tying your pigtails, make sure to use a good quality hair product, such as a strong-hold gel or mousse, to provide support.

Key Takeaways

Tying a pigtail strap depends on whether you mean a fishing knot or a hairstyle; both require careful looping and securing for strength and stability. For Fishing (Pigtail Knot)Thread the line through the hook eye or swivel. Form a loop by doubling back the line and creating a small loop near the hook.

Wrap the tag end around the standing line 4–6 times. Pass the tag end through the loop you initially formed. Moisten the knot with water or saliva to reduce friction.

Tighten slowly by pulling both the standing line and tag end evenly until the knot is snug. Trim the excess line close to the knot for a clean finish. This knot is strong and reliable for securing hooks or lures ( ).

For Hairstyling (Pigtail Strap / Top Knot)Divide hair into two equal sections for pigtails or gather a single section for a top knot. Twist or braid each section tightly to form a rope-like strand. Loop the twisted hair around itself or a hair tie to create a secure knot or bun.

Secure with hair ties or pins to prevent unraveling. Adjust for symmetry and smooth any loose strands for a neat appearance ( ).

Tips

For fishing, always practice tying the knot before using it in real situations to ensure it holds under tension ( ). For hair, using slightly damp hair or styling products can help the pigtail strap stay in place longer. Watching video tutorials can be very helpful to visualize the steps and ensure proper technique ( ).

By following these steps, you can tie a strong and secure pigtail strap whether for fishing or hairstyling.
