36 circuit breaker distribution boxes

Overview

Aufputzverteiler 3-reihig 36TE IP40 The 3-row surface-mounted distribution boxes are ideal for power distribution and line protection in private apartments.

Key Takeaways

A 36-circuit breaker distribution box is an electrical panel designed to safely distribute power across 36 circuits, available in metal or plastic, surface-mounted or flush-mounted, and suitable for residential, commercial, or industrial use.

Overview

A 36-way distribution box is designed to accommodate up to 36 circuit breakers, allowing organized and safe power distribution across multiple circuits. These boxes are essential for managing electricity in large residential setups, offices, factories, or construction sites, providing protection against overloads and short circuits through integrated mini circuit breakers (MCBs) or earth-leakage devices.

Types and Materials

Metal Distribution Boxes: Made from steel or aluminum, these boxes are highly durable, resistant to heat, shocks, and fire, and suitable for both indoor and outdoor use. Examples include the Havells 3x12 metal distribution box. Plastic Distribution Boxes: Typically made from ABS or other high-impact plastics, offering lightweight construction and corrosion resistance.

They are ideal for indoor use and come with protection ratings like IP40 or IP66. Mounting OptionsSurface-Mounted: Installed on walls, these boxes are easy to access and maintain. They often include lockable doors and pre-installed N and PE terminals for quick wiring.

Flush-

Mounted: Recessed into walls for a cleaner appearance, suitable for residential or commercial interiors. These boxes integrate seamlessly with the wall and provide a neat installation. Protection RatingsIP40: Protects against solid objects larger than 1 mm, suitable for dry indoor environments.

IP66: Provides dust-tight and water-resistant protection, suitable for outdoor or industrial environments.

Applications

Residential: Managing multiple circuits in large homes or apartments. Commercial: Offices, shops, and small industrial setups requiring organized power distribution. Industrial: Factories and construction sites with heavy electrical loads, often using three-phase power systems.

Features

Accommodates 36 modules or breakers. Compatible with MCBs, RCDs, and other protective devices. Available with transparent or smoked covers for easy inspection.

Designed to meet IEC 60670 and other international standards.

Conclusion

A 36-circuit breaker distribution box provides a reliable, organized, and safe solution for distributing electricity across multiple circuits. Choosing between metal or plastic, surface or flush-mounted, and the appropriate IP rating depends on the installation environment and load requirements.
