45° elbow European-style cable tray current price

Overview

Cable trays Cable trays Discover a comprehensive range of high-quality cable trays and cable ladders at ekabel24.com – the reliable choice for safe, organi.

Key Takeaways

The price of a 45° European-style cable tray elbow varies widely depending on material, size, and manufacturer, typically ranging from €20 to €150 per piece.

Factors Affecting Price

Material: Elbows can be made from galvanized steel, aluminum, GRP (glass-fiber reinforced polyester), or electrostatically coated metals.

GR

P elbows, like the KPC series from Ebo Systems, are generally more expensive due to corrosion resistance and lightweight properties. Size and Load Capacity: Larger elbows designed for heavy cable loads or industrial applications cost more.

Eurotray and DK

C Europe offer elbows compatible with medium and high-voltage cable trays. Finish and Coating: Hot-dip galvanized, pre-galvanized, or powder-coated finishes affect durability and price. Powder-coated or RAL-colored elbows, such as pebble grey RAL 7032, are typically higher in cost.

Supplier and Region: Prices vary by supplier and country. European distributors like ATKORE, DKC Europe, and Ebo Systems may offer different pricing depending on shipping, VAT, and bulk order discounts.

How to Obtain Accurate Pricing

Request a Quote: Most suppliers, including Ebo Systems and ATKORE, require direct contact to provide a quote based on your project specifications. Check Product Sheets: Product datasheets often list compatible sizes and materials, which helps suppliers calculate accurate pricing. Consider Bulk Orders: Ordering multiple elbows or a complete cable tray system may reduce the per-unit cost.

Summary

While a typical 45° European-style cable tray elbow costs between €20 and €150, the exact price depends on material, size, finish, and supplier. For precise pricing, it is recommended to contact suppliers directly and provide specifications such as cable load, tray width, and material preference.
