Key Takeaways

Outdoor optical cable prices vary widely based on type, core count, armoring, and order volume, ranging from $0. 02 to $0. 10 per meter for bulk purchases.

Pricing Overview

Outdoor optical cable prices depend on several factors including fiber type (single-mode or multi-mode), core count, jacket material (PE, PVC, LSZH), armoring, and environmental specifications. For bulk orders, prices can range from $0. 02/meter for basic flat cables to $0.

10/meter for standard single-mode cables at high volumes (10,000+ meters) from manufacturers like Hunan GL Technology and Zhengzhou Weunion. Specialized cables for harsh environments or with enhanced fire ratings command higher prices.

Factors Affecting Price

Core Count and Fiber Type: Higher core counts and single-mode fibers generally cost more. Protective Features: Armored, waterproof, or double-sheath cables increase durability and price. Jacket Material: PE jackets are common for outdoor use; LSZH or PVC may be required for specific safety standards.
