Key Takeaways

An ALT Lighting Distribution Box is a robust electrical enclosure designed to manage and distribute power for lighting systems, offering flexibility, safety, and compatibility with various control devices. OverviewALT, also known as Arrow Lighting Technologies, specializes in high-quality LED lighting solutions for residential, commercial, and industrial projects. Their lighting distribution boxes serve as central hubs for connecting multiple luminaires, ensuring organized wiring, safe power distribution, and compatibility with lighting control systems.

These boxes are designed to meet project-specific requirements while maintaining durability and compliance with electrical standards.

Key Features

Durable Construction: Many lighting distribution boxes, such as those from flex7, feature anodized aluminum or high-grade synthetic materials for robustness and long-term performance. Flexible Wiring Options: Boxes typically include multiple cable entry points, spacious wiring compartments, and clearly labeled terminals to accommodate various conductor sizes (e.g., 2. 5mm², 4mm², 6mm²),.

Compatibility: ALT distribution boxes can support traditional hard-wired 230V switches, DALI systems, or centralized lighting control headends, making them versatile for different lighting setups. Expansion Capability: Some models allow plug-in expansion boxes to increase outlet capacity, enabling additional luminaires without replacing the main box. Safety and Compliance: Boxes are designed to meet IP protection standards (e.g., IP68 for outdoor use), safety class II, and relevant wiring regulations.

Applications

Residential: Centralized control for home lighting, including indoor and outdoor installations. Commercial: Efficient distribution for office, retail, or industrial lighting systems. Outdoor and Landscape: Weatherproof boxes for garden lighting, pathway illumination, or architectural lighting projects.

Installation Considerations

Ensure proper mounting using supplied clips, screws, or brackets. Verify compatibility with the intended control system (DALI, 230V switches, or other devices). For outdoor installations, seal the box with appropriate compounds to maintain IP protection.

Follow local electrical codes and safety standards during installation.
