Busbar Distribution Box Manufacturer

Overview

Manufactured to BS EN 61439-6, the IBAR range of power distribution busbar trunking system products has been developed to meet the growing and ever developing demands of the critical power industry.

Key Takeaways

Leading manufacturers of distribution box busbars include ABB, Siemens, GE, Legrand, Mersen, and specialized industrial suppliers offering copper and aluminium busbar systems.

Overview of Busbar Systems

A busbar is a metallic strip, typically made of copper or aluminium, used to distribute large amounts of electrical current within distribution boxes, switchgear, or industrial panels. Busbar systems can be modular, insulated, or flexible, and are designed to handle currents ranging from a few hundred amperes to several hundred thousand amperes. They ensure efficient power distribution, reduce energy loss, and provide safe connection points for incoming and outgoing cables.

Key Global ManufacturersABB: Offers advanced busbar and trunking systems with laminated busbars for EV drivetrains, renewable energy integration, and predictive maintenance capabilities. Known for high-voltage reliability and global presence. Siemens: Provides modular busbar systems for industrial and commercial applications, emphasizing safety, efficiency, and global standards.

General Electric (GE): Specializes in heavy-duty copper busbars for industrial and medium-voltage systems, with a strong reputation in infrastructure projects. Legrand: Focuses on modular busbars for commercial interiors, SMEs, and flexible workspace power distribution, offering easy installation and aesthetic solutions. Mersen: Produces laminated and insulated busbars, particularly for EVs, renewable energy, and high-performance industrial applications.

Specialized Industrial SuppliersVision®Electric: Manufactures customized busbar systems from 1,200 to 300,000 A for harsh industrial environments, including data centers, wind and e-mobility applications, and high-current electrolysis processes.

CMA

K: Offers modular enclosed and flexible insulated busbars for cranes, mobile equipment, and industrial machinery, with operating temperatures from -30°C to 105°C.

Rittal Ri

Line: Provides modular busbar systems for AC/DC applications up to 2,100 A, with tool-free mounting, short-circuit resistance, and full contact hazard protection.

Considerations for Selection

When choosing a busbar manufacturer, consider: Current rating and voltage requirementsMaterial: Copper for high conductivity, aluminium for lightweight applicationsModularity and customization for specific industrial or commercial setupsInsulation and safety features for contact protection and short-circuit resistanceGlobal support and service for installation, maintenance, and compliance with local standardsThese manufacturers and suppliers provide a wide range of distribution box busbars suitable for industrial, commercial, and renewable energy applications, ensuring reliable and efficient power distribution.

A busbar is a metallic conductor, typically made of copper or aluminium, designed to distribute large amounts of electrical current within a

IBAR | Anord Mardix

Manufactured to BS EN 61439-6, the IBAR range of power distribution busbar trunking system products has been developed to meet the growing and ever developing demands of the critical power industry.

EMS | ⚡ Busbar Systems Vision®Electric Customized

Especially for harsh and industrial environments, we engineer and manufacture Busbar Systems from 1,200 to 300,000 amperes (A) according to your specifications and requirements.

EAE Electric | Busbar Energy Distribution Systems

EAE Electric makes energy distribution safer and more sustainable with its modular Busbar Systems and Support System solutions that eliminate cable clutter in high-rise buildings.

Distribution busbar

Find your distribution busbar easily amongst the 31 products from the leading brands (SIEMENS, BTICINO, Lettel, ...) on DirectIndustry, the industry specialist for your professional purchases.

Distribution boxes – For modular and decentralized

Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution

Bus Bar | Laminated bus bar | power distribution | Mersen

With over sixty years of experience in designing laminated bus bars and complete in-house manufacturing capability, we have the flexibility and expertise to respond to our customers''

BUSBAR Range Distribution systems for distribution boards | Gewiss

The BUSBAR range, in addition to distribution terminal blocks, consists of flat and shaped busbars in copper and aluminium in order to make distribution system inside QDX boards.
