Cable tray horizontal pricing

Overview

Cable tray are used in wiring of buildings to support electrical cables and wires that are used to distribute power, controls and communication.

Key Takeaways

Horizontal cable trays typically range from $20 to $150 per 2. 4-meter section, depending on material, size, and certifications.

Pricing Overview

The cost of horizontal cable trays varies widely based on material, dimensions, load capacity, and compliance certifications. Standard hot-dip galvanized ladder-type trays of 2. 4 meters generally start around $20–$50 per section for basic steel models, while stainless steel (304/316) or powder-coated trays can cost $80–$150 or more per section due to corrosion resistance and aesthetic finishes.

Aluminum trays are also available and are typically priced in the mid-range, offering lightweight and corrosion-resistant options.

Factors Affecting Price

Material & Coating: Galvanized steel is standard; stainless steel and powder coatings increase cost. Dimensions & Load Class: Wider or deeper trays, or those rated for higher cable loads (e.g., NEMA 20A), command higher prices. Certifications: CE, UL, or IEC certifications can add 10–25% to the base price.

Customization: Non-standard sizes, horizontal elbows, tees, or integrated support systems increase cost. Volume Discounts: Bulk orders (500–1000 meters) often reduce unit price significantly.

Fittings and Accessories

Horizontal cable tray systems often require elbows, tees, reducers, and support brackets, which are priced per piece. For example, a horizontal elbow or tee can range from $15 to $60, depending on material and size. Accessories like D-rings, finger ducts, and brush panels for racks and cabinets are also available, typically priced $10–$40 per unit.

Supplier Considerations

Prices vary by supplier type and reliability. Manufacturers with long-standing operations and high review scores may offer better long-term value and warranty support, while distributors may provide faster shipping but slightly higher prices. Online stores like Graybar, Grainger, and ShowMeCables allow ZIP-code-specific pricing and immediate availability for standard trays.

Summary

For a standard 2. 4-meter horizontal cable tray: Basic galvanized steel: $20–$50Stainless steel or powder-coated: $80–$150+Fittings/accessories: $10–$60 per piece When budgeting, consider material, load requirements, certifications, and quantity discounts to determine the most cost-effective solution for your project.
