Cable tray main channel

Overview

A Channel Cable Tray is a compact, one-piece, U-shaped support system, typically 1-3/4″ deep, designed to carry a single power cable or multiple smaller cables like instrumentation, data, and control wires. It's the go-to solution for precise, point-to-point cable routing. T&B channel tray systems are fabricated from a corrosion-resistant metal (low-carbon steel, stainless steel or an aluminum alloy) or from a metal with a corrosion-resistant finish (zinc or epoxy). The choice of material for any particular installation depends on the installation environment. nch runs from the main cable tray system to electr cal devices or other equipment. It is available with a ventilated or solid bottom. It is commonly furnished in 4″ or 6″ widths, creating a compact and unobtrusive profile. Each cable tray type performs a different function and comes in various materials such as aluminum. Channel cable tray features lightweight, high load-bearing capacity, aesthetically pleasing, simple structure, and easy to install.
