Can cable trays be folded down

Overview

Thanks to the special swing mechanism, the Swing cable tray can be easily folded to one side to allow easy access to all cables.

Key Takeaways

Yes, many cable trays are designed to fold down, allowing easy access to cables, power strips, and adapters while keeping your workspace organized. Functionality and DesignFold-down cable trays are specifically engineered to provide flexible access to cables without removing the tray. Some models, like the Actiforce Swing cable tray, feature a swing mechanism that allows the tray to fold to one side and adjust to multiple height positions for legroom or larger plugs.

Other designs, such as the Boho Office fold-down tray, can fold on both sides, making it easy to reach cables, sockets, and power supply units while maintaining a neat appearance. Fabric-based fold-down trays, like the Univivi tray, offer a soft, pull-down design that lets you access cables without crawling under the desk. These trays often combine metal brackets with durable fabric baskets, providing both strength and flexibility.

Installation and CompatibilityFold-down trays can be mounted using clamp systems, screw mounts, or a combination, depending on desk type and thickness. Clamp mounts are ideal for renters or delicate surfaces, while screw mounts provide long-term stability. Most trays are compatible with standard desktops with a minimum thickness of around 2 cm, and some allow height adjustments to accommodate different desk setups.

Benefits

Easy access: Fold-down trays let you reach cables and devices without removing the tray. Organized workspace: Keeps cables, power strips, and adapters neatly arranged. Flexible use: Adjustable height and foldable sides accommodate various desk configurations.

Durable materials: Options include powder-coated steel, metal brackets, and flame-retardant fabrics for safety and longevity. Fold-down cable trays are ideal for home offices, gaming setups, or professional workspaces where frequent cable access is needed, combining practicality with a clean, organized look.
