Comprehensive Price Chart for Optical Cable Lines

Overview

Discover the cost of fiber optic cable in this pricing guide. Learn material prices, installation factors, and what impacts total project costs overall.

Key Takeaways

Optical cable prices vary widely based on fiber type, strand count, installation environment, and project complexity, ranging from $0. 13 to $6 per foot for the cable itself, with total project costs reaching $22,000 or more for large outdoor installations. Price Ranges by Cable Type and Fiber CountSingle-mode fiber (SMF): $0.

10–$0. 50 per foot for standard indoor cables; outdoor or armored variants can reach $0. 90–$1.

00 per foot. Multimode fiber (OM3/OM4): $0. 30–$1.

00 per foot, depending on strand count and jacket type. High-count backbone cables: 288-strand cables can cost $6 per foot or more. Pre-terminated assemblies and patch cables: Prices increase with factory termination and connector type.

Installation and Project Costs

Basic indoor run (1,000 ft, single-mode): Cable $0. 40/ft, labor $1. 00/ft, permits $150, accessories $100; total ≈ $2,650–$3,100.

Mid-range outdoor run (2,000 ft, conduit, 4 terminations): Cable $0. 70/ft, labor $1. 60/ft, permits $350, delivery $120, accessories $250; total ≈ $4,940–$6,120.

Premium outdoor run (5,000 ft, armored, multiple splices, professional testing): Cable $1. 00/ft, labor $3. 00/ft, permits $900, delivery $350, extended warranty; total ≈ $11,000–$14,500.

Full deployment scenario (6,500 ft outdoor with armor, 6 terminations): Total ≈ $15,000–$20,000.

Factors Affecting Pricing

Fiber type and count: Single-mode fibers cost more than multimode; higher strand counts increase cost proportionally. Cable construction: Indoor riser-rated cables are cheaper than plenum-rated; armored or direct-burial cables are more expensive. Installation environment: Outdoor runs with trenching, conduit, or protective ducting increase labor and material costs.

Connectors and termination: Factory-terminated cables and specialized connectors add to the total cost. Regional variations: Urban areas may have higher labor and permit costs (+15–25%), while rural areas may have lower labor but higher delivery costs (±5–15%) affecting total project pricing. Permits and local regulations: Costs vary by municipality and can add hundreds to thousands of dollars.

Long-term considerations: Maintenance, patch panels, and potential fiber repairs should be factored into five-year cost projections.

Summary

Optical cable pricing is influenced by fiber type, strand count, cable construction, installation complexity, and regional factors. For budgeting purposes, small indoor runs may cost a few thousand dollars, while large outdoor deployments with armored cables and multiple terminations can exceed $20,000. Per-foot cable costs typically range from $0.

13 to $6, with total project costs including labor, permits, and accessories significantly higher.
