Constant Temperature Cabinet Cold Aisle Armor Manufacturer

Overview

In 2024, Worthington Armstrong Venture (WAVE), a joint venture between Armstrong World Industries, Inc., acquired all of the assets of Data Center Resources, LLC (DCR) related to the design and manufacture of customizable, modular aisle. Cold aisle containment creates an enclosed corridor in front of server cabinets, ensuring that the coldest air goes directly into equipment intakes. By isolating the cold aisle, containment reduces unintended mixing of cold supply air with hot exhaust air, maintaining uniform, predictable. Maintain optimal temperature control in your data center while ensuring easy equipment access with our containment dual sliding door, accommodating aisle widths of four and six feet. T equipment is kept at an effective temperature. Pre-assembled frame with slide-locks for easy installation, airtight gaskets, ergonomic handles, and panel options in clear or multiwall. Altimir. Data centers opting for cold containment deliver cold air through a raised floor into the aisle.
