Dunhua Optical Cable in Democratic Republic of Congo

Overview

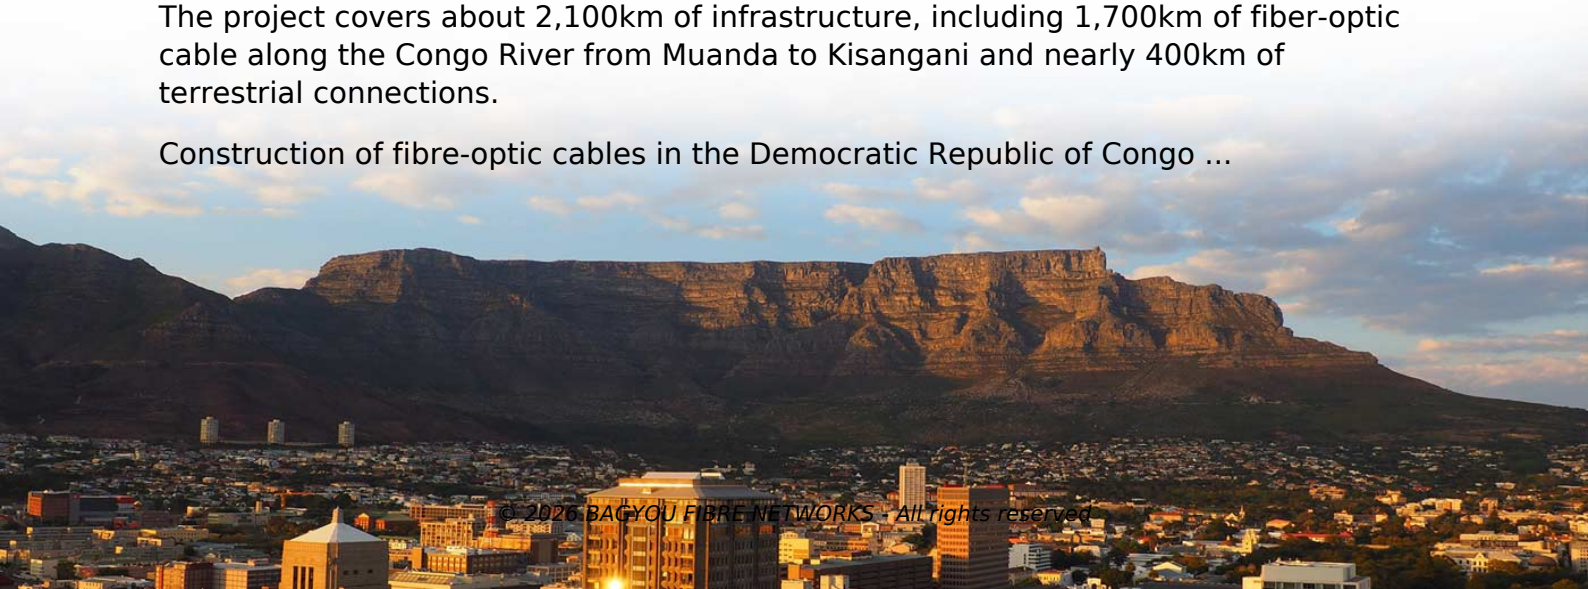

The proposed project covers about 2,100 kilometers of infrastructure, including 1,700 kilometers of fiber-optic cable along the Congo River from Muanda to Kisangani and nearly 400 kilometers of terrestrial connections. The DRC and Genew Technologies plan to build about 2,100km of fiber. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. Congo Cables & Transformers was established in early 2022 with an objective to provide complete power solutions that includes copper Bar, Copper Wires & Cables Copper Pipes, Aluminium Conductors, Tranformers etc. On June 25, 2026, the government, through the Ministry of Posts, Telecommunications and Digital Affairs, signed a memorandum of understanding with China's Genew.
