Factory Custom Cable Tray Prices

Overview

Cable Tray Price List Find reliable cable tray price lists from trusted suppliers. Shop high-quality, customized, and affordable options for your electrica.

Key Takeaways

Custom cable tray prices vary widely, typically ranging from $2 to $25 per meter depending on material, type, size, and finish, with factory-direct pricing offering potential cost savings for bulk orders.

Price Overview

Factory prices for custom cable trays depend on several factors including material, coating, size, and order quantity. Common materials include hot-dip galvanized steel, stainless steel (304/316), and aluminum, with galvanized steel being the most cost-effective and stainless steel offering superior corrosion resistance. Aluminum trays are lightweight and rust-proof but generally more expensive than steel.

The type of tray—perforated, ladder, wire mesh, or trough—also affects pricing, with ladder trays typically costing more due to higher load capacity, while perforated trays can save 15% or more compared to ladder types for lighter cables (ApexTray).

Customization and Specifications

Factories like Shandong Hongfeng and suppliers on Alibaba and Made-in-China offer full customization for dimensions, thickness, color, and non-standard specifications. Standard widths range from 50 mm to 900 mm, side rail heights from 12 mm to 200 mm, and lengths of 2 m, 2. 44 m, or 3 m are common.

Maximum working loads vary by size and material, typically 100–500 kg per section. Minimum order quantities (MOQ) are often 100 pieces or 100 meters, depending on the supplier.

Quality and Certifications

Reputable manufacturers provide ISO9001, CE, UL, CCC, and SGS certifications, ensuring compliance with international standards. Perforated designs improve earthquake resistance, cable stability, and ventilation, while pre-galvanized or hot-dip galvanized finishes enhance durability and corrosion protection.

Cost-

Saving Tips

Bulk orders can significantly reduce per-meter costs. Material choice impacts price: galvanized steel is cheaper than stainless steel or aluminum. Tray type: switching from ladder to perforated trays can save 15% or more.

Factory-direct purchases often include pre-shipment inspection and platform-supported logistics for secure transactions.

Applications

Custom cable trays are widely used in industrial, construction, communication, solar power, and thermal power projects, providing organized, safe, and space-efficient cable management. By considering material, tray type, customization, and order volume, buyers can optimize both cost and performance for their specific project needs.
