# Fiber Optic Equipment Room Patch Panel

## Overview

A fiber patch panel is a mounted enclosure—either rack-mounted or wall-mounted—used to terminate, manage, and interconnect multiple fiber optic cables. It acts as a hub for organizing splices and patch cords, streamlining fiber management and preserving signal integrity. We offer multiple fiber optic patch panels including LC, ST, SC, FC, MTRJ, and MPO connector options. Our 19-inch rack-mount panels are constructed from. In an FTTH network hub—whether a central office, local exchange, or data. UHDX ultra high-density fiber patch panels patch up to 144 LC fibers per RU to provide an inter-connect or cross-connect between backbone horizontal cable and active equipment while minimizing rack space in a frame or cabinet.
