

Fireproof cables and fire-resistant cable trays supplied by manufacturers

Overview

With our fire protection for cable systems, we ensure that your lines meet the highest safety standards and are reliably protected in the event of an emergency.

Key Takeaways

Leading manufacturers of fireproof cables and cable trays include Flamro, NewReach, and several specialized Chinese suppliers offering high-quality, fire-resistant solutions.

Flamro

Flamro provides fire protection solutions for cables and cable trays using products like FLAMMOTECT-A fire protection coating and DG-CR 0.7 fire protection tape. These solutions are designed to prevent flame propagation, maintain cable functionality during fires, and enhance resistance to environmental factors such as UV radiation, moisture, salt water, and chemicals.

Flamro's products are suitable for industrial plants, hospitals, airports, power stations, and nuclear facilities, ensuring compliance with high safety standards and reliable emergency performance. NewReach specializes in fire-rated cable trays that maintain structural integrity during fires. Their trays are made from powder-coated aluminum, galvanized steel, and fiberglass with intumescent coatings, providing high-temperature resistance and preventing flame spread.

These trays support critical systems like emergency lighting, fire alarms, and building management systems, ensuring operational continuity during fire incidents.

New

Reach integrates FLAMMOTECT-A and DG-CR 0.7 technologies into their trays for enhanced fire protection.

Chinese Manufacturers

Several Chinese suppliers offer industrial-grade fireproof cable trays with features such as high-temperature resistance, corrosion protection, and customizable dimensions. Examples include: Galv Cable Tray: Offers trough-type, powder-coated, high-temperature resistant cable trays suitable for industrial and commercial applications. Guangdong Tianlai Steel Conduit: Produces fireproof tray-type cable trays made from galvanized steel, stainless steel, or aluminum with fire-retardant coatings, designed for power plants, petrochemical facilities, and large commercial buildings.

TONGZHO

U Machinery Factory: Manufactures a wide range of cable trays including wire mesh, perforated, channel, ladder, and large-span steel trays in materials like galvanized steel, stainless steel, aluminum, and FRP. They offer customization, OEM/ODM services, and fast delivery.

Key Features to Consider

Fire Resistance: Ability to maintain structural integrity and prevent flame propagation. Material Options: Galvanized steel, stainless steel, aluminum, fiberglass, and FRP. Environmental Protection: Resistance to moisture, UV, chemicals, and corrosion.

Compliance: Adherence to fire safety codes and industrial standards. Customization: Flexible dimensions, modular design, and integration with grounding or cable management systems. These manufacturers provide solutions for critical infrastructure, industrial plants, commercial buildings, and high-risk environments, ensuring both safety and operational continuity during fire events.
