

Guyana uses explosion-proof distribution boxes

Overview

The sturdy CEAG junction boxes made of light metal are used to distribute and conduct electricity in Zone 1 and Zone 2 areas with no risk of explosion. Optionally, mantle terminals with a terminal range of 6 mm² are available for these branching boxes. According to the electric scheme and main technical parameters offered by user, select explosion-proof electrical equipments and, decide the outline dimensions of distribution board, to satisfy user's locale. Choose an explosion-proof distribution box for reliable power distribution, easier maintenance, and Mainly used for power distribution of temporary or mobile jobs. Standards for electricity supply 5. Frequency, voltage and meter accuracy standards 8. Mode of supply to consumer's meter box. Storage of explosive imported into Guyana. Restriction of right to import.
