High-precision Columbia fiber optic couplers in stock

Overview

Fiber Optic Couplers | Fiber Optical ST Couplers for Sale | RSOur inventory features high-performance components from industry-leading brands such as Pandu.

Key Takeaways

High-precision fiber optic couplers suitable for Columbia applications are available from multiple suppliers, including EFB-Elektronik, RS, Agiltron, Thorlabs, and Newport, offering singlemode, multimode, and polarization-maintaining options. Supplier Options and SpecificationsEFB-Elektronik offers a wide range of fiber optic couplers, including LC, SC, MTP, and E2000 types, with low attenuation and high-quality ceramic sleeves. They provide both standard and customized designs, suitable for high-performance fiber optic applications, with fast and reliable delivery for in-stock items (EFB-Elektronik).

R

S Components stocks high-performance couplers from brands like Panduit, Phoenix Contact, L-com, and RS PRO. Their couplers support precise light splitting or combining, maintaining signal quality across multiple channels.

S provides technical guidance for coupling ratios, wavelength compatibility, and industrial-grade applications (RS). Agiltron specializes in couplers and splitters for singlemode, multimode, polarization-maintaining, large-core, and double-clad fibers, covering 300–2000 nm wavelengths. They offer fusion, micro-optics, and planar lightwave circuit (PLC) couplers, with low insertion loss (~0.

3 dB for fusion), high polarization extinction ratios, and thermal stability up to 300°C. Custom splitting ratios are available for PLC couplers at higher setup costs (Agiltron). Thorlabs provides FiberPort collimators and couplers with high-resolution alignment, thermal stability, and factory-aligned collimation.

They support FC/PC, FC/APC, and SMA fiber bulkheads, with achromatic or aspheric lenses for broad wavelength coverage. These couplers are ideal for precise laboratory or industrial optical setups (Thorlabs). Newport offers fiber optic couplers for splitting or combining light in optical fibers, suitable for research and industrial applications, with options for singlemode and multimode fibers (Newport).

Key Considerations

Fiber Type: Singlemode, multimode, or polarization-maintaining depending on your system requirements. Coupling Ratio: Fixed or customizable ratios for precise signal distribution. Insertion Loss: Low-loss couplers (as low as 0.

3 dB for fusion types) ensure minimal signal degradation. Wavelength Range: Choose couplers compatible with your operating wavelength (300–2000 nm for Agiltron). Thermal and Mechanical Stability: Important for industrial or high-power applications.

For immediate availability, it is recommended to contact the suppliers directly to confirm stock and request technical support for selecting the optimal coupler for your Columbia fiber optic system.
