Household electrical distribution boxes available for immediate purchase

Overview

Amazon.com: Power Distribution BoxBrowse power distribution boxes with circuit breaker protection and multiple outlet configurations. Shop durable solution.

Key Takeaways

You can find a wide range of household electrical distribution boxes in stock today from major retailers like Home Depot, Lowe's, Ace Hardware, Walmart, Amazon, and specialized suppliers such as Graybar and Zoro.

Options and Types

Main Breaker Panels: These include a main breaker to shut off all circuits and are available in amperages from 100A to 200A. Examples include Square D Homeline 100–200A panels and Eaton Type BR panels, suitable for indoor or outdoor installation. Main Lug Panels: These panels do not have a main breaker and require a separate disconnect.

They are ideal for subpanels or secondary distribution points in a home. Subpanels: Used to group circuits for specific areas, such as a basement or garage, subpanels are available in various amperages and configurations.

Portable/

Temporary Power Distribution Boxes: These are suitable for construction sites, workshops, or outdoor events. They often include multiple outlets, GFCI protection, and twist-lock inlets. Examples include 50A and 30A portable boxes from Southwire, CEP, and Champion Power Equipment.

Indoor/

Outdoor Junction Boxes: Available in plastic, aluminum, or galvanized steel, these boxes range from single-gang to multi-gang configurations. Many are weatherproof (IP65/IP66) and suitable for residential or light commercial use.

Retailers and Availability

Home Depot: Offers main breaker and main lug load centers, circuit breakers, and accessories with options for next-day delivery or in-store pickup. Lowe's: Stocks Square D, Eaton, and ABB panels with amperages up to 200A, including indoor and outdoor models. Ace Hardware: Provides panels, load centers, and transfer switches, with in-store pickup available for immediate acquisition.

Walmart: Offers a variety of distribution boxes, including temporary power centers and waterproof junction boxes, priced from under $10 to several hundred dollars. Amazon: Features over 10,000 power distribution boxes, including portable, GFCI-protected, and battery-adapted models for RVs, workshops, and home use. Graybar and Zoro: Supply industrial-grade and residential electrical boxes, including weatherproof, floor, and junction boxes with multiple gang options.

Key Considerations

Amperage: Match the panel's amperage to your home's electrical load (commonly 100A–200A for residential use). Indoor vs Outdoor: Ensure the box is rated for the installation environment; outdoor boxes should be weatherproof. Circuit Capacity: Consider the number of circuits needed for your home or project.

Accessories: Ground bars, filler plates, and covers may be required for proper installation. Safety: Always follow local electrical codes and consult a licensed electrician for installation. You can purchase these boxes online for delivery or check local store inventory for immediate pickup to meet your household electrical distribution needs.
