How much does a Palau-type intelligent PDU meter cost

Overview

Understand intelligent PDU features like remote monitoring, energy analytics, and pricing factors. Learn how they optimize power management and reduce costs.

Key Takeaways

A Palau-type intelligent PDU meter typically costs between $500 and $1,500, depending on features, outlet count, and monitoring capabilities.

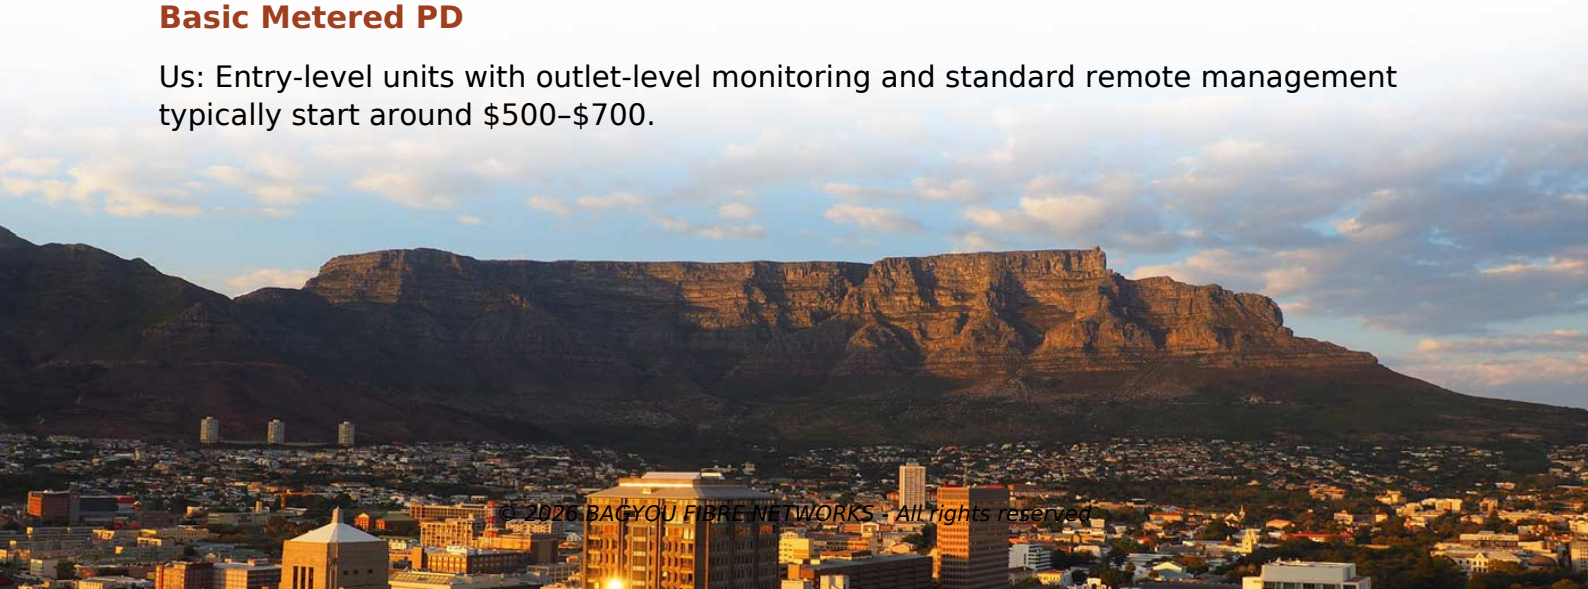

Intelligent PD

Us, including Palau-type meters, are designed for advanced power management in data centers and IT environments. They provide outlet-level metering, remote monitoring, and energy tracking, which allows operators to optimize power usage, prevent downtime, and manage devices efficiently. The cost varies based on factors such as the number of outlets, supported voltage and current ratings, network connectivity options (Ethernet, Wi-Fi, Bluetooth), and integration with DCIM software.

Pricing Considerations

Basic Metered PD

Us: Entry-level units with outlet-level monitoring and standard remote management typically start around $500–$700.

Advanced Intelligent PD

Us: Units with features like dual Ethernet ports, daisy-chaining, environmental sensors, and firmware management can range from $1,000 to $1,500 or more.

Cost-

Saving Alternatives: Using smart power cables with a basic PDU can reduce first-year costs by approximately 30% and subsequent years by up to 74%, offering a more budget-friendly option while still providing monitoring functionality.

Additional Factors

Outlet Type and Configuration: PDUs with mixed C13/C19 outlets or slide-locking mechanisms may cost more due to flexibility and safety features. Installation and Maintenance: Some intelligent PDUs allow hot-swappable controllers and zero-touch provisioning, which can reduce operational downtime but may increase initial cost. Customization: Vendors like Elcom and Panduit offer tailored solutions for high-density racks or industrial environments, which can affect pricing depending on the level of customization required.

In summary, while a Palau-type intelligent PDU meter generally falls in the $500–$1,500 range, the final cost depends on the specific features, outlet configuration, and integration requirements for your data center or IT setup.
