How much does armored pigtail cost per meter

Overview

Where we sell armoured cables by the metre, you will receive the full amount of metres in a coil, not in separate lengths.

Key Takeaways

Armored pigtail cables typically cost between $2 and $10 per meter, depending on type, size, and supplier.

Overview

Armored pigtails are specialized cables, often used in fiber optic or electrical installations, with a protective outer layer to prevent mechanical damage. Prices vary based on: Cable type: Fiber optic armored pigtails are generally more expensive than standard electrical armored cables. Core size and material: Larger conductor sizes or higher-quality fiber increase cost.

Supplier and quantity: Wholesale purchases or bulk orders can reduce the per-meter price.

Typical Price Range

Fiber optic armored pigtails: $3–$10 per meter, depending on fiber type (single-mode or multi-mode) and connector type. Electrical armored cables (SWA or PVC armored): $2–$6 per meter for common sizes like 1. 5mm² to 16mm².

Purchasing Tips

Check supplier catalogs: Websites like FiberZON and Alibaba list armored pigtails with bulk pricing options. Contact sales teams: For precise pricing, especially for large orders or custom lengths, contacting suppliers directly is recommended. Consider delivery and shipping: Prices per meter may not include shipping, which can affect total cost.

In summary, while exact prices vary, expect armored pigtails to cost roughly $2–$10 per meter, with fiber optic types at the higher end and standard electrical types at the lower end. For accurate quotes, reach out to suppliers with your specifications.
