How much does it cost to purchase an optical cable terminal box

Overview

Amazon.com: Fiber Termination BoxFiber Optic Wall Mount Box with LC Couplers for Single Mode & Multimode Fiber Optic Cable. | Fiber Box Enclosure for MPOE'.

Key Takeaways

On-site optical cable terminal boxes typically range from $10 to $150 per unit, depending on capacity, type, and features.

Price Range and Factors

The cost of an optical cable terminal box varies based on several factors: Port Capacity: Small 2–4 port FTTH terminal boxes are generally priced around $10–$30, while larger 12–16 port boxes can cost $50–$150 depending on the manufacturer and material used. Indoor vs Outdoor: Outdoor boxes with IP65–IP67 ratings for dust and water protection are more expensive than indoor wall-mounted units. Material and Durability: Boxes made from flame-retardant PC or ABS materials with high mechanical strength and environmental stability are priced higher due to better protection and longevity.

Connector Types: Units supporting multiple adapter types (SC, LC, FC) or pre-installed PLC splitters may increase the price. Supplier and Purchase Volume: Wholesale or factory-direct purchases from China can reduce costs significantly, especially for bulk orders, while retail platforms like Amazon may have higher per-unit prices for small quantities.

Typical Examples

Small Indoor FTT

H Terminal Box: 2–4 ports, wall-mounted, IP54, priced around $10–$25 per unit. Medium Capacity Box: 8–12 ports, indoor/outdoor, IP65, flame-retardant material, priced $40–$80 per unit.

High-

Density Outdoor Box: 16–24 ports, IP65–IP67, suitable for pole or wall mounting, priced $100–$150 per unit.

Purchasing Tips

Compare multiple suppliers to ensure competitive pricing and reliability. Consider the installation environment (indoor/outdoor) and required port capacity before selecting a model. Check for pre-installed splitters or adapters if needed for your network setup, as this can affect both cost and installation time.

For large-scale deployments, bulk orders from manufacturers can significantly reduce per-unit costs. By considering these factors, you can select an optical cable terminal box that balances cost, durability, and network requirements.
