# How to check optical module compatibility

## Overview

Learn how to check optical transceiver firmware, verify compatibility, and prevent network downtime. When using optical modules with switches, you need to confirm the compatibility between the optical module model and the switch model to avoid compatibility failures. Whether you manage a data-center fabric, campus switches, or carrier transport, a short verification workflow—inspect, back up, validate, test—keeps new modules from. Cisco does not support third party optics. For the guideline on third party components, see Section 6 of Cisco's Non-Entitlement Policy. Upgrade to 100G or 400G optics and save.
