Metal jumper in distribution box

Overview

Jumper bars, also known as shorting bars, are used to connect neighboring negative terminals in a terminal block. Typically made of metal, there are both insulated and uncoated varieties of jumper bars. [0m:32s] While that description can sound a bit complicated, trust me is very. Terminal block jumpers are lengths of conductive material used to electrically connect two or more block positions together. Browse our selection of strip jumpers below and use our. Create your own DB25 adapters with these versatile adapter kits. Tracers from the PCB pads to pre-drilled holes allow the user to custom wire their adapter by using the 20 supplied jumper wires. This provides a convenient way to expand the number of wires attached to a single node.
