Methods for fixing cable tray cover plates with bolts

Overview

The fittings can fastened to the cable tray rail either with double clamps of type DOP A2 or with truss-head bolts of type FRS and combination nuts. The exceptions to this are vertical bends, adjustable bend elements and fittings with a side height of 35 mm. Each method has different advantages depending on installation speed, load requirements, and flexibility. When mounting these trays, consider the following. ➡ How it works: The hoop wraps around the cable tray and the cover. You then tighten it with a bolt or a screw. ➡ Materials: 304 stainless steel, so it's strong and corrosion-resistant. Very strong hold: It provides a firm grip on the. There are five common ways to fix the cover plate of cable tray elbow supplier: pressing plate fixing, screwing fastening, clasping fixing, padlock fixing and seven-shaped buckle fixing.
