Multimode fiber optic to FC connector

Overview

FC/APC Fiber Connector: Multimode, Ceramic FerruleAs an alternative to buying and assembling separate optical fiber, connectors, and furcation tubing, Thor.

Key Takeaways

A multimode fiber optic cable with FC connectors is designed for short- to medium-distance data transmission, featuring a larger core that supports multiple light modes and FC/PC or FC/APC terminations for reliable connections.

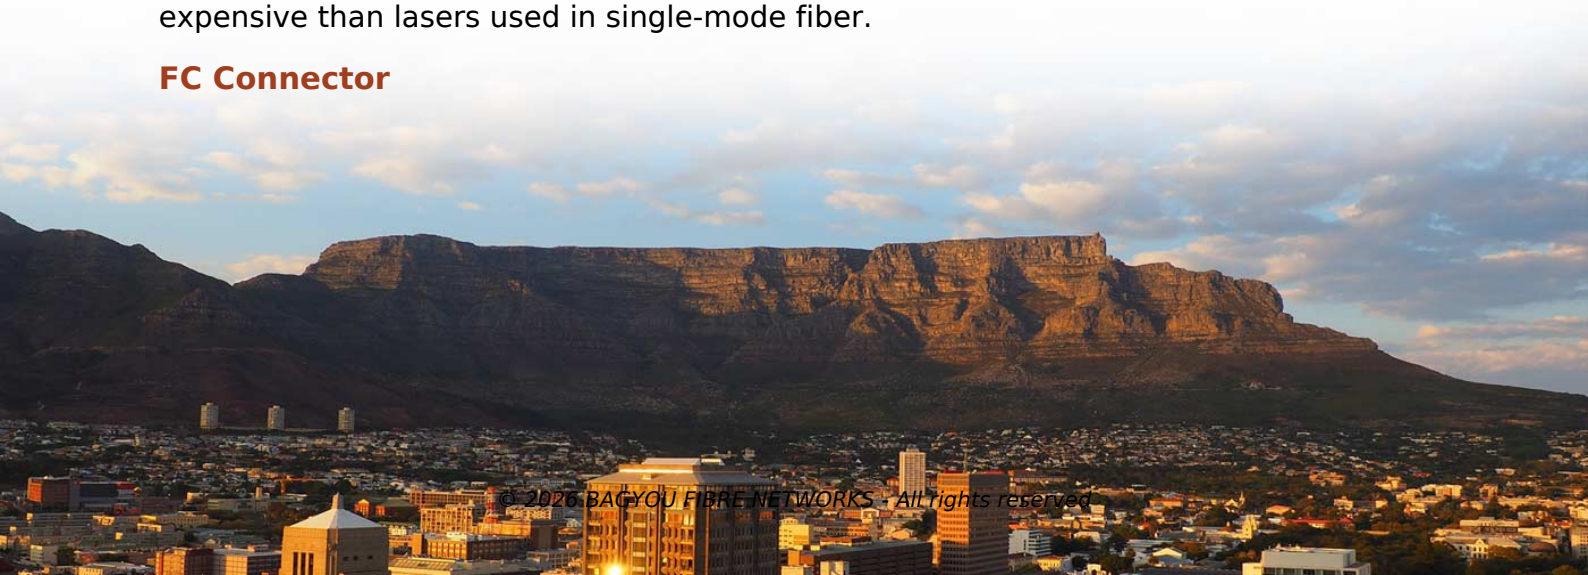

Overview

Multimode fiber (MMF) is an optical fiber type with a relatively large core diameter, typically 50–100 µm, allowing multiple light modes to propagate simultaneously. This design makes MMF ideal for short-distance communication, such as within buildings, data centers, or campus networks, supporting data rates up to 100 Gbps over distances of 300–550 meters depending on fiber type (OM3, OM4, OM5) and wavelength.

MM

F is cost-effective because it can use LEDs or VCSELs as light sources, which are less expensive than lasers used in single-mode fiber.

FC Connector

The F

C (Ferrule Connector) is a threaded fiber optic connector that provides high mechanical stability and low insertion loss, making it suitable for laboratory, industrial, and telecom applications.

F

C connectors are available in PC (Physical Contact), UPC (Ultra Physical Contact), and APC (Angled Physical Contact) polishing types, which affect return loss and reflection performance. The ferrules are typically made of ceramic or stainless steel, and protective caps are used to prevent dust contamination. Cable Types and SpecificationsStep-Index vs Graded-Index: Step-index MMF has a uniform core refractive index, while graded-index MMF gradually changes the refractive index to reduce modal dispersion, improving bandwidth over longer distances.

Lengths: Common stock lengths include 1 m, 2 m, 3 m, and 5 m, with custom lengths available. Core Diameter and Numerical Aperture (NA): Typical MMF has a 50 µm core with 0. 22 NA, suitable for standard multimode applications.

Applications: Used for fiber optic patching, connecting network equipment, FTTH, telecom, and lab instrumentation.

Advantages

Ease of alignment and installation due to larger core size. Lower cost for short-distance high-speed networks. Compatibility with a wide range of equipment and connector types.

Durability with threaded FC connectors that resist vibration and movement.

Considerations

Not suitable for long-distance transmission due to modal dispersion. High optical power can damage the epoxy in connectors; specialized fibers are recommended for high-power applications. Connector type and polishing affect signal reflection and insertion loss, so selection should match system requirements.

In summary, multimode FC fiber optic cables are versatile, reliable, and cost-effective solutions for short- to medium-range optical communication, offering multiple connector and fiber options to suit various networking and laboratory applications.

FC/APC Fiber Connector: Multimode, Ceramic Ferrule

As an alternative to buying and assembling separate optical fiber, connectors, and furcation tubing, Thorlabs also offers custom pre-built patch cables using the

FC Connectors

We offer a variety of FC fiber optic connectors to accommodate both single-mode fibers and large-core multimode optical fibers. The FC is a keyed connector with a 2.5mm ferrule and utilizes a threaded

Fiber Optic FC Connectors

We offer high-quality FC connectors in single-mode and multimode options, with UPC or APC options. Choose from field termination, heat cure, anaerobic cure,

Customised FC Boot Size Singlemode/Multimode Fibre Optic

FS supply various kinds of Single Mode and Multimode fiber optic connectors for FC applications. Each fiber optic connector is functionally tested before shipping.

Fiber Optic Couplers & Adapters

Our single mode fiber adapters feature ceramic sleeves for precision alignment and our multimode fiber adapters are built with bronze alignment sleeves for extra durability.

Fiber Connector Types

However, the widely used types are about a dozen of fiber optic connectors, which can be divided into single-fiber, duplex fiber connectors (such

FC To FC MM Fiber Patch Cable OM2 Simplex – Topfiberbox

This FC To FC Fiber Patch cable is a multimode cable with FC connector on both ends. Fiber patch cord is commonly used to connect the equipment in fiber-optic networks.

uxcell FC to FC Fiber Coupler Flange Type Fiber

[Easily installed]: Quick assembly FC connector can provide quick and easy termination of fibers in the field. Fiber optic adapters are widely used in optical

Go4Fiber Ltd-One Stop Fiber Optic Superstore

Go4Fiber Pulse Suppressor, 100m mutlimode 62.5/125um with bulkheads, FC connector GPS-MM-0100B-FC-FC Availability: US$389.00 US$250.00 Qty:

SENKO LC Connector, Multimode, 127µm Ceramic Ferrule, 900µm Boot

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

The SENKO Standard 2PC LC Connector features a two-piece design for robust, easy installation in factory and field settings. It supports Multimode fibers with low insertion loss and high return loss,

Everything you need to know about fiber optic termination

Different connectors and splice termination procedures are used for singlemode and multimode connectors, so make sure you know what the fiber will be before you

Fiber Optic Patch Cord, Single Mode & Multimode Patch Cord

Fiber Optic Patch Cord In this category, you will find various duplex and simplex LC/SC/FC/ST/Uniboot LC/MDC fiber optic patchcords, which are used to connect network devices such as switches,

Multimode Fiber Optic Connector Market Ecosystem ...

The multimode fiber optic connector market is poised for steady long-term growth, driven by the increasing demand for high-speed data transmission in telecommunications, data centers, and ...

Multimode Fiber Optic Patch Cables

Thorlabs offers a variety of step-index and graded-index multimode fiber optic patch cables with standard FC/PC or SMA connectors, including square-core fiber. AR-coated and uncoated fluoride

Fiber Optic Cable Color Codes

Since the earliest days of fiber optics, orange, black or gray was multimode and yellow singlemode. However, the advent of metallic connectors like the FC and

4pcs 1M Jumper Cable Duplex Multimode LC-LC LC to LC Fiber Optic ...

Any other connector type at another side upon request; Fan-out request; Superior quality standard PC/UPC/APC polishing; factory test (Insertion Loss & Return Loss); 3.0mm cable optional Material:

Fiber Connector Types: Lc Vs Sc Vs St Vs Fc — Which

Compare LC, SC, ST and FC fiber connectors by form factor, insertion loss, durability and best use cases. Clear guidance for data center, FTTH, industrial

Fiber Optic Adapter Guide: Types, Tips & Solutions | FiberMania

Fiber optic adapters play a critical role in ensuring stable and low-loss fiber connections. This guide covers adapter types, selection criteria, cleaning tips, FAQs, and B2B customization
