New Supplier of Server Racks for Smart Buildings

Overview

Purpose-Built Racks & Cabinets As a premier rack and cabinet manufacturer and supplier, we offer products engineered for nearly any application or environment.

Key Takeaways

Aginode, Flex, Vertiv, and Data Rack Technologies are key suppliers offering modern server racks optimized for smart buildings and AI-driven workloads. Aginode – Rack Unit Solution (RUS)Aginode recently launched its Rack Unit Solution (RUS), designed specifically for smart buildings and data centers.

The RU

S cabinets are pre-equipped, robust, and optimized for cabling, airflow, and security, simplifying deployment and operation across multiple environments. The range includes three types of racks with accessories tailored for data centers and smart buildings. Currently, these racks are available in Europe, the Middle East, and Africa.

Flex – ORv3-Compliant and Custom RacksFlex provides Open Compute Project (OCP) ORv3-compliant racks and fully customizable enclosures for high-density compute infrastructure. Their solutions are engineered for AI, high-performance computing, and enterprise workloads, with a focus on rapid deployment, sustainability, and precision manufacturing. Flex leverages robotics and automation to enhance production efficiency and offers regional customization to meet local data center requirements.

Vertiv – Modular and Scalable SolutionsVertiv offers modular racks, cabinets, and enclosures that adapt to growing IT infrastructure needs. Their solutions provide flexibility, cost-effectiveness, and secure containment for critical IT systems. Vertiv emphasizes scalable smart solutions, supporting AI, liquid cooling, and high-performance computing, making them suitable for smart building integration.

Data Rack Technologies – Custom and Premium RacksData Rack Technologies specializes in high-quality server cabinets, wall-mounted racks, and customized metal fabrications. Their racks feature durable cold-rolled steel, multiple door options, high load capacity, and ISO-certified designs. They also provide rack accessories such as trays, fans, PDUs, shelves, and cable managers, catering to telecom, networking, and AV setups.

They serve global enterprise and government clients, offering tailored solutions for modern IT infrastructure.

Considerations for Smart Building Deployments

When selecting a supplier for smart building server racks, consider: Airflow and thermal management for high-density deploymentsSecurity and access control for sensitive IT equipmentModularity and scalability to accommodate future expansionRegional availability and support for maintenance and installationCompatibility with AI and IoT workloads for smart building automationThese suppliers provide a mix of new innovative solutions (Aginode) and established global options (Flex, Vertiv, Data Rack Technologies), allowing smart building operators to choose racks that meet both current and future infrastructure needs.
