New Zealand Cable Tray Series

Overview

EMT and Kiwitray cable trays offer flexible light to medium duty cable containment with four depth options in PG or HDG finishes for NZ commercial and institutional projects.

Key Takeaways

New Zealand's latest cable trays include high-performance FRP systems and durable steel trays designed for harsh environments, offering corrosion resistance, lightweight construction, and faster installation.

FR

P Cable Trays (EXduro™ by Treadwell Group)Treadwell Group's EXduro™ FRP cable trays are engineered for New Zealand's and Australia's harsh environments. These trays are lightweight, fireproof, non-corrosive, and resistant to chemicals and UV rays, making them more durable than traditional metal systems. They are available in ladder and solid tray designs, with pre-assembled fittings, pre-drilled straight sections, and both flat and peaked covers for superior water and debris runoff.

The system is designed for a 50-year lifespan, supporting light single wiring and pneumatic tubing systems while enabling faster installation and uninterrupted operation. Steel Cable Trays (Stern and EzyTray)Steel & Tube offers the EzyTray range, providing a full suite of steel cable trays and ladders suitable for all cable containment needs. These trays are compatible with BIM-enabled 2D and 3D CAD designs, allowing precise planning and installation.

Similarly, Stern Cable Trays from Equip Supply are durable, easy-to-install steel trays for commercial and industrial projects, designed to simplify routing and support of electrical and data cabling while reducing installation time.

Custom and Versatile Solutions

Companies like Tilley & Patton Ltd provide versatile and cost-effective cable support systems, including custom-designed sheet metal trays tailored to specific project requirements. These solutions allow for flexibility in design and installation, ensuring compliance with local standards and project-specific needs.

Key Advantages of New Cable Tray Types

Corrosion and chemical resistance (FRP trays)Lightweight and non-conductive (FRP)Durable steel options for heavy-duty applicationsFaster installation with pre-assembled or pre-drilled componentsLong-term reliability, with some systems engineered for 50 yearsCompatibility with modern design tools (BIM, CAD) These innovations in cable tray technology provide New Zealand industries with safer, more efficient, and longer-lasting cable management solutions, suitable for both industrial and commercial applications.
