New Zealand Secondary Distribution Box Assembly

Overview

Protect the reliability and efficiency of your processes with a complete range of high-quality, standard and custom enclosures for electrical distribution, data network and industrial automation applications.

Key Takeaways

Secondary distribution boxes in New Zealand are modular, standards-compliant switchboards designed for safe and efficient power distribution across residential, commercial, and industrial applications.

Overview

Secondary distribution boxes, also known as distribution boards or panelboards, are essential for dividing electrical power from the main supply into subsidiary circuits while providing protection via circuit breakers or fuses. In New Zealand, these assemblies are designed to comply with AS/NZS 61439 standards, ensuring safety, reliability, and performance across various sectors.

Key Manufacturers and Solutions

Trical N

Z: Offers a range of distribution boards under brands like GAEL, known for modular low and high voltage switchboards, motor control centers, and control panels.

GAE

L boards are widely used across domestic, commercial, and industrial sectors, providing reliable and cost-effective solutions.

NH

P New Zealand: Provides compact pole covers, surface and flush-mounted loadcentres, and distribution panelboards. Their systems are user-friendly, quick to install, and suitable for domestic, commercial, industrial, and mining applications. Schneider Electric: Supplies modular systems like PrismaSeT, Prisma G, and Prisma P, which allow flexible assembly of switchboards up to 4000 A.

These systems integrate busbars, enclosures, and Acti9 devices (MCBs, RCDs) for indoor and outdoor environments, including waterproof and weatherproof options. Switchbuild: Specializes in custom switchboard design and system integration, including PLC and SCADA programming. They provide tailored solutions for complex projects, ensuring compliance, safety, and optimal performance.

Stainless Electrical Products (SEP): Focuses on precision-engineered stainless steel enclosures and modular cabinets, offering IP66-rated solutions with integrated switch disconnectors and customizable configurations for industrial and infrastructure projects.

Features and Considerations

Modularity: Many New Zealand assemblies are modular, allowing easy expansion or reconfiguration. Systems like PrismaSeT and GAEL modular boards support flexible layouts and quick assembly. Enclosure Types: Options include wall-mounted, floor-standing, weatherproof, and IP-rated enclosures suitable for indoor and outdoor installations.

Compliance: All major suppliers ensure compliance with AS/NZS 61439, covering electrical safety, insulation, and mechanical robustness. Applications: Suitable for residential, commercial, industrial, and mining sectors, with options for high-current, low-voltage, and motor control applications. Integration: Advanced systems can integrate with digital monitoring and energy management software for improved reliability and efficiency.

Conclusion

In New Zealand, secondary distribution box assemblies are widely available from reputable manufacturers offering modular, standards-compliant, and customizable solutions. Selection depends on the application, required capacity, environmental conditions, and integration needs. For specialized or large-scale projects, companies like Switchbuild and SEP provide tailored engineering and assembly services, while GAEL, NHP, and Schneider Electric offer reliable off-the-shelf modular solutions suitable for most installations.
