Optical module lxsfp

Overview

The LX and Industrial Grade LX SFP modules provide a 1000BASE-X optical connection using LC connectors and SMF (single-mode fiber) cable up to 10 km long. For a complete listing of hardware compatible with these modules, see the Extreme Optics Compatibility website. The industry-standard Cisco Small Form-Factor Pluggable (SFP) Gigabit Interface Converter (Figure 1) links your switches and routers to the network. The hot-swappable input/output device plugs into a Gigabit Ethernet port or slot. These modules are essential components in telecommunication and data communication networks, providing the necessary interfaces for. SFP (Small Form-factor Pluggable) modules are standardized network transceivers that support a range of data rates (1G, 10G, 25G) and fiber types. Long-distance variants, typically referred to as LX, EX, ZX, or ER/LR SFPs, are engineered with higher optical power budgets and longer wavelength. Juniper Networks® has platforms ranging from the Juniper Networks CTP Series Circuit to Packet Platforms, BX Series Multi-Access Gateways, E Series Broadband Services Routers, M Series Multiservice Edge Routers, MX Series 3D Universal Edge Routers, to the T Series Core Routers.
