Price of Aluminum Ribbon Armored Optical Cable

Overview

For high-quality ribbon cables and expert assistance, contact American Tech Supply today. Our team is ready to help you find the right cable solution for your project.

Key Takeaways

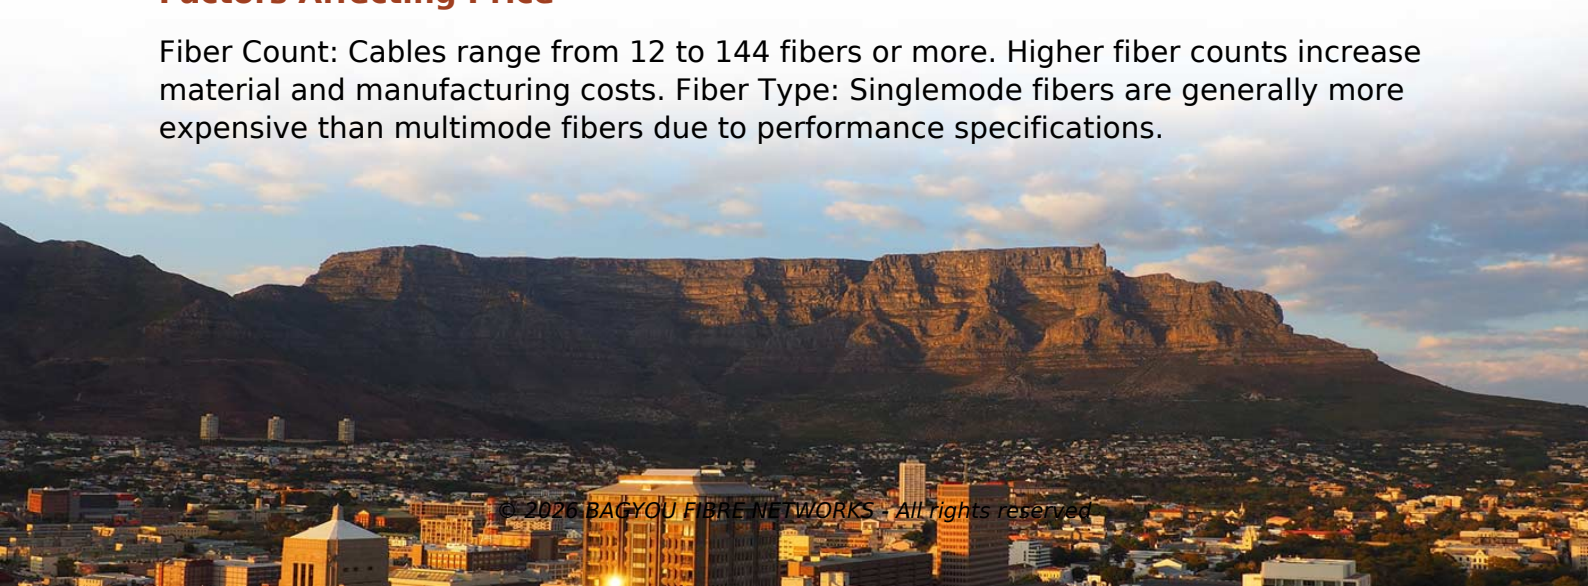

The price of Aluminum Ribbon Armored Optical Cable varies widely depending on fiber count, type, and supplier, typically requiring a direct quote from manufacturers or distributors.

Overview

Aluminum Ribbon Armored Optical Cable is designed for high-density fiber networks with enhanced protection. The cable features ribbonized fibers inside a central tube, surrounded by spirally wrapped aluminum interlocking armor, providing superior crush resistance and flexibility during installation. These cables are suitable for indoor riser, backbone, and outdoor applications, offering protection against rodents, moisture, and mechanical stress.

Factors Affecting Price

Fiber Count: Cables range from 12 to 144 fibers or more. Higher fiber counts increase material and manufacturing costs. Fiber Type: Singlemode fibers are generally more expensive than multimode fibers due to performance specifications.

Armor Material: Aluminum interlocking armor is more flexible than steel, which can slightly affect cost. Application Rating: Plenum, riser, or direct burial ratings influence price due to additional fire-retardant or environmental protection requirements. Supplier and Brand: Premium brands like Corning or Sumitomo Electric may charge more for certified performance and ease of installation features.

Typical Procurement Approach

Since prices are not standardized online, the most reliable way to obtain current pricing is to contact suppliers directly. For example: American Tech Supply offers armored ribbon cables for data centers and telecom networks and provides custom quotes based on project requirements. Corning and Sumitomo Electric provide detailed specifications and can supply pricing upon request for specific fiber counts and cable types.

Primus Cable lists aluminum armored options for indoor/outdoor use, and pricing is available through direct inquiry.

Recommendation

To get an accurate price: Determine the fiber count, type, and application needed. Contact multiple suppliers for quotes, including shipping and any installation accessories. Consider bulk orders or overstock options, which may reduce cost per meter.

By following this approach, you can obtain a precise, project-specific price for Aluminum Ribbon Armored Optical Cable.
