Price of High-End Fiber Optic Terminal Boxes

Overview

Fiber Termination Boxes For Sale Fiber optic terminal box for sale, buy high quality fiber termination box with competitive and reasonable price in Fiberin.

Key Takeaways

Fiber optic terminal boxes typically range from $20 to $150, depending on capacity, type, and brand.

Price Range Overview

The cost of a fiber optic terminal box varies based on several factors: Capacity: Small boxes for 6–12 fibers generally cost $20–$50, while larger boxes supporting 24–48 fibers can range from $60–$150. Type: Wall-mounted boxes are usually less expensive than rack-mounted or outdoor-rated boxes, which may include additional protective features. Brand and Quality: Well-known brands like FS, Fibertronics, and Fiberinthebox may charge higher prices due to warranties, technical support, and build quality.

Features Affecting Price

Material and Durability: Boxes made from high-quality ABS or metal enclosures for outdoor use are more expensive. Connector Type: LC, SC, or MPO couplers can influence cost, with MPO-equipped boxes generally priced higher. Splice Capacity: Boxes designed to hold more splices or pigtails require larger enclosures, increasing the price.

Additional Accessories: Some boxes include adapters, splice trays, or cable management features, which can add $10–$30 to the base price.

Practical Considerations

For most indoor network installations, a standard 12–24 fiber wall-mounted terminal box is sufficient and typically costs $30–$80. For larger telecom or outdoor deployments, expect to pay $100–$150 for robust, high-capacity boxes with enhanced protection and management features. Purchasing online from vendors like Amazon, FS, or Fiberinthebox allows comparison of prices and features, while contacting suppliers like Fibertronics can provide custom quotes for specific requirements.
