Price of Optical Cable Pre-installed Brackets

Overview

Pre-terminated fiber cable assemblies save 30-50% on install costs vs field splicing. Learn types, connectors, pricing, and how to order custom fiber optic cable assemblies from BWNFiber.

Key Takeaways

Optical cable support brackets typically range from $5 to $50 per unit, depending on material, type, and size.

Overview

Optical cable support brackets are used to securely mount and organize fiber optic cables on poles, walls, or other structures. They are commonly made from galvanized steel, stainless steel, aluminum, or durable thermoplastics to withstand weather, wind, and ice loads. Brackets can be designed for ADSS drop cables, FTTH installations, or general fiber optic cable management.

Price Factors

Material: Galvanized steel or carbon steel brackets are generally more affordable, around $5–$15 per piece. Stainless steel or aluminum alloy brackets, which offer higher corrosion resistance, can cost $15–$50 per piece. Thermoplastic or UV-stabilized PPE brackets for ADSS cables are usually in the $10–$30 range per kit, often sold with mounting hardware.

Type and Size: Pole hooks and anchor brackets for single cables are cheaper. Wall-mounted or multi-cable support brackets with larger load capacity or adjustable features are more expensive. Kits that include multiple brackets and clamps for fiber storage or cable trays can cost $30–$100 per kit.

Supplier and Region: Prices vary by manufacturer and shipping location. Chinese suppliers often offer lower prices for bulk orders, while North American or European suppliers may charge more for certified or industrial-grade brackets.

Purchasing Tips

Check specifications: Ensure the bracket supports the cable type (ADSS, FTTH, or standard fiber optic) and environmental conditions. Consider kits: Some brackets come with clamps, bolts, and tie-wraps, which can reduce installation time. Request quotes: For large projects, contact suppliers directly to get bulk pricing and shipping costs.

Compliance: Look for brackets meeting Telcordia, ASTM, or ISO standards for durability and safety. In summary, expect to pay $5–$50 per bracket, with higher-end materials and kits costing more. For precise pricing, contacting suppliers like Hebei Songguang Fastener Manufacturing, AFL Global, or JERA Line is recommended.
