Price of Outdoor Single-Mode Armored Optical Cable

Overview

Amazon.com: Outdoor Fiber Optic CableIndustrial-grade outdoor fiber optic cables with armor protection. Multiple configurations for long-distance transmiss.

Key Takeaways

The price of single-mode outdoor armored optical cable typically ranges from $2. 00 to $7. 00 per foot, with variations depending on construction, length, and pre-termination features.

Pricing OverviewSingle-mode outdoor armored fiber optic cables are designed for durability in harsh environments, including direct burial, rodent resistance, and water-blocking protection. The cost depends on several factors: Construction Type: Standard corrugated steel or aluminum interlocking armor affects flexibility and durability, influencing price. Cable Features: Pre-terminated cables with connectors (e.g., LC) and tested low insertion loss (IL) and return loss (RL) are more expensive than bulk cable.

Length: Bulk cables are priced per foot, typically $2. 00–$7. 00 per foot, while pre-terminated assemblies may cost more due to labor and testing.

Application: Outdoor-rated, armored cables for direct burial or long-distance transmission (up to 40 km) are priced higher than indoor or general-purpose cables.

Example Products

Fiber Savvy Armored Fiber: Offers steel or aluminum armored cables suitable for outdoor and direct burial applications, with Corning® glass fibers and aramid yarn reinforcement.trueCABLE Pre-Terminated Armored Singlemode: Stainless steel armored, crush and rodent resistant, compliant with ANSI/TIA and IEC standards, ideal for outdoor installations. Amazon 30ft OS2 LC-LC Patch Cable: Armored single-mode fiber patch cable for outdoor use, supporting 10G–100G Ethernet, priced per assembly rather than per foot.

Key Considerations

Bulk vs Pre-Terminated: Pre-terminated cables save installation time but cost more per foot. Environmental Protection: Armored cables are essential for outdoor, direct burial, or high-risk areas. Distance and Bandwidth: Longer runs and higher bandwidth requirements may increase cost.

In summary, for budgeting purposes, expect $2–$7 per foot for bulk armored single-mode outdoor fiber, with pre-terminated or specialized cables potentially costing more depending on length, connectors, and environmental protection features.
