

Price of a 25kW distribution box

Overview

PDP-25KW – PD Power Systems The equipment is designed for safe operation and conforms to the NEC for outdoor use. Input: The 25kW PDP has one 60-amp, 4-pole.

Key Takeaways

The price of a 25kW distribution box typically ranges from \$2,000 to \$5,000, depending on specifications, certifications, and application requirements.

Price Overview

The cost of a 25kW distribution box varies significantly based on its design, materials, and intended use. Industrial and commercial units with standard 208Y/120V 3-phase configurations, multiple output receptacles, and weatherproof enclosures generally fall in the \$2,000–\$3,500 range. Military-grade or expeditionary units, designed for rugged outdoor use with NEMA 3R ratings, GFCI protection, and custom connectors, can cost \$4,000–\$5,000 or more due to enhanced durability and compliance with NFPA 70 and other standards (Larson Electronics, Lex Innovations, PD Power Systems).

Factors Affecting Price

Material and Construction: Units made from aircraft-grade aluminum or galvanized steel are more expensive than standard steel enclosures due to durability and corrosion resistance. **Certifications and Compliance:** Military or industrial certifications, such as NFPA 70 compliance, NEMA 3R rating, and GFCI protection, increase cost. **Number and Type of Receptacles:** More output circuits, higher amperage connectors, and specialized plugs (e.g., MS-Class L pin/sleeve) add to the price.

Customization: Custom-built units for specific applications, including expeditionary or base camp setups, can significantly increase the cost. Installation and Accessories: Additional costs may include mounting hardware, cabling, and optional smart monitoring or remote control features.

Typical Applications25k

W distribution boxes are used in industrial facilities, construction sites, military deployments, base camps, and portable lighting setups. They provide safe power distribution to multiple devices and often include circuit breakers, overload protection, and weatherproofing for outdoor use.

Summary

For budgeting purposes, a standard 25kW distribution box can be expected to cost around \$2,000–\$3,500, while military or highly customized units may reach \$4,000–\$5,000 or higher. Prices vary based on materials, certifications, number of circuits, and additional features, so it is recommended to request a quote from manufacturers for precise pricing.
