Price of cable tray nut set

Overview

The M6 x 16mm cable tray bolt & flange nut set provides secure fastening support for cable trays and channel systems with minimal surface obstruction.

Key Takeaways

Cable tray nuts typically range from $0. 02 to $1. 50 per piece, depending on material, size, and purchase quantity.

Price OverviewLow-cost bulk options: Some suppliers offer cable tray bolt and nut sets starting at $0. 02 per piece, usually requiring a minimum order of 10,000 pieces, suitable for industrial or large-scale projects. Standard industrial use: For perforated galvanized steel cable trays, the price is around $1.

50 per bolt-nut set, with the option to purchase even a single unit for smaller projects. Amazon retail options: Pre-packaged sets, such as M6 x 12mm zinc-plated flange nuts, are available in boxes and priced according to quantity, typically ranging from $0. 05 to $1 per piece depending on material and finish.

Material and Cost Considerations

Stainless steel: Offers high corrosion resistance, ideal for outdoor or marine environments, and is generally more expensive than galvanized steel. Galvanized steel: Cost-effective for moderate environmental exposure, commonly used in construction and industrial settings. Brass: Suitable for light load-bearing applications and marine environments, moderately priced.

High-strength alloy steel: Used for heavy-duty applications, typically at a higher cost due to load-bearing capacity.

Additional Notes

Prices vary based on size (commonly M6), coating, and bulk quantity. Lock nuts or nuts with nylon inserts may be slightly more expensive due to vibration resistance features. For large-scale industrial procurement, bulk orders significantly reduce per-unit cost, while retail purchases for small projects are higher per piece.

In summary, when budgeting for cable tray nuts, expect $0. 02–$1. 50 per piece, with material choice, size, and order quantity being the main factors affecting price.
