Price quote for explosion-proof electric valve distribution box

Overview

Explosion Proof Distribution Box & Electrical EnclosuresDurable Hexlon Explosion Proof Distribution Boxes and Electrical Enclosures, IECEx and ATEX certifi.

Key Takeaways

Explosion-proof electric valve distribution boxes typically range from $200 to over $2,000 depending on size, material, and certification.

Price Ranges and Factors

The cost of explosion-proof distribution boxes varies widely based on several factors: Size and Capacity: Small junction boxes or compact enclosures for low-voltage terminations generally start around $200–$500, suitable for confined spaces or small I/O connections. Larger distribution boxes or control panels designed to house multiple circuits or high-power equipment can exceed $1,500–$2,000. Material: Common materials include stainless steel (AISI 304L or 316L), aluminum, and glass-reinforced polyester (GRP).

Stainless steel enclosures offer superior corrosion resistance and mechanical strength, often increasing the price compared to aluminum or polycarbonate models. Certifications: Boxes certified for ATEX, IECEx, UL, or NEC standards for hazardous areas (Zones 1, 2, 21, 22) are more expensive due to rigorous testing and compliance requirements. Protection Rating: Enclosures with IP66 or higher ratings, ensuring dust-tight and water-resistant protection, typically cost more than standard models.

Customization: Pre-assembled terminal boxes or fully customized control panels with integrated operator elements, cable glands, or tempered glass windows can significantly increase the price, sometimes adding several hundred dollars to the base cost. Typical ApplicationsExplosion-proof distribution boxes are widely used in oil & gas, chemical processing, mining, offshore platforms, wastewater treatment, and grain handling. They are designed to contain internal sparks or explosions and prevent ignition of surrounding flammable atmospheres.

Summary

For a standard compact explosion-proof junction box, expect prices around $200–$500. Medium-sized stainless steel or aluminum distribution boxes typically range from $500–$1,500, while large, fully customized control panels or high-capacity enclosures can exceed $2,000. Prices are influenced by size, material, certification, IP rating, and customization.
