Key Takeaways

Disassembly of relay protection devices requires careful adherence to safety protocols, proper tools, and step-by-step procedures to ensure safe handling and component recovery.

Safety Precautions

Before disassembly, ensure the device is completely de-energized and disconnected from all power sources. Use personal protective equipment (PPE) such as insulated gloves, safety glasses, and anti-static wrist straps to prevent electrical shock, burns, or arc flash hazards (Rockwell Automation guidelines). Work in a grounded, ESD-protected area to protect sensitive electronic components (Siemens SIPROTEC 4 manual).

Required Tools

Common tools for disassembly include: Screwdrivers (TX10, flathead, or Phillips depending on device)Nut drivers or socket sets (e.g., 5 mm for SIPROTEC connectors)Pliers and tweezers for small componentsAnti-static mats and wrist straps for ESD-sensitive partsTorque-limited electric screwdrivers for modular components (max torque ~0. 7 Nm for ABB REX615) Step-by-Step Disassembly ProcedureABB REX615 ExampleRemove finger screws from side modules (COM & AIM) by hand. Lift out the modules carefully.

Remove metal plates using a TX10 screwdriver. Follow the exploded-view diagram to separate all modules and internal components for recycling or inspection.

Siemens SIPROTE

C 4 7SJ61 ExampleRemove screws on D-sub connectors at interface locations (A, B, C) if applicable. Remove front cover caps and loosen accessible screws. Carefully lift off the front cover.

Disassemble internal modules using a socket or nut driver, taking care to note component orientation and labeling.

General Guidelines

Document the position and orientation of all modules and connectors for reassembly. Handle hazardous substances according to REACH and RoHS regulations; these are typically identified in the device manuals. Avoid forcing components; modular relays are designed for tool-assisted removal.

Dispose or recycle components according to local environmental regulations. Additional ResourcesABB REX615 Disassembly Manual provides material separation and recycling guidance. Rockwell Automation emphasizes trained personnel and adherence to safety codes for all disassembly activities.
