Specifications of aluminum plate for distribution box protective cover

Overview

5052A aluminum plate for distribution box 5052A aluminum plate is a modified alloy of 5052 aluminum plate. The material has good corrosion resistance, weld.

Key Takeaways

Europe 5052 aluminum plate is commonly used for distribution box protective covers due to its corrosion resistance, medium strength, and excellent formability.

Material Composition and Properties

The aluminum plate used for distribution box covers is typically 5052 Al-Mg alloy, which offers high corrosion resistance, good welding performance, and medium mechanical strength. Its chemical composition includes Si: 0. 25–0.

5%, Fe: 0. 3–0. 5%, Cu:
