# Supplier of European-style ladder cable trays

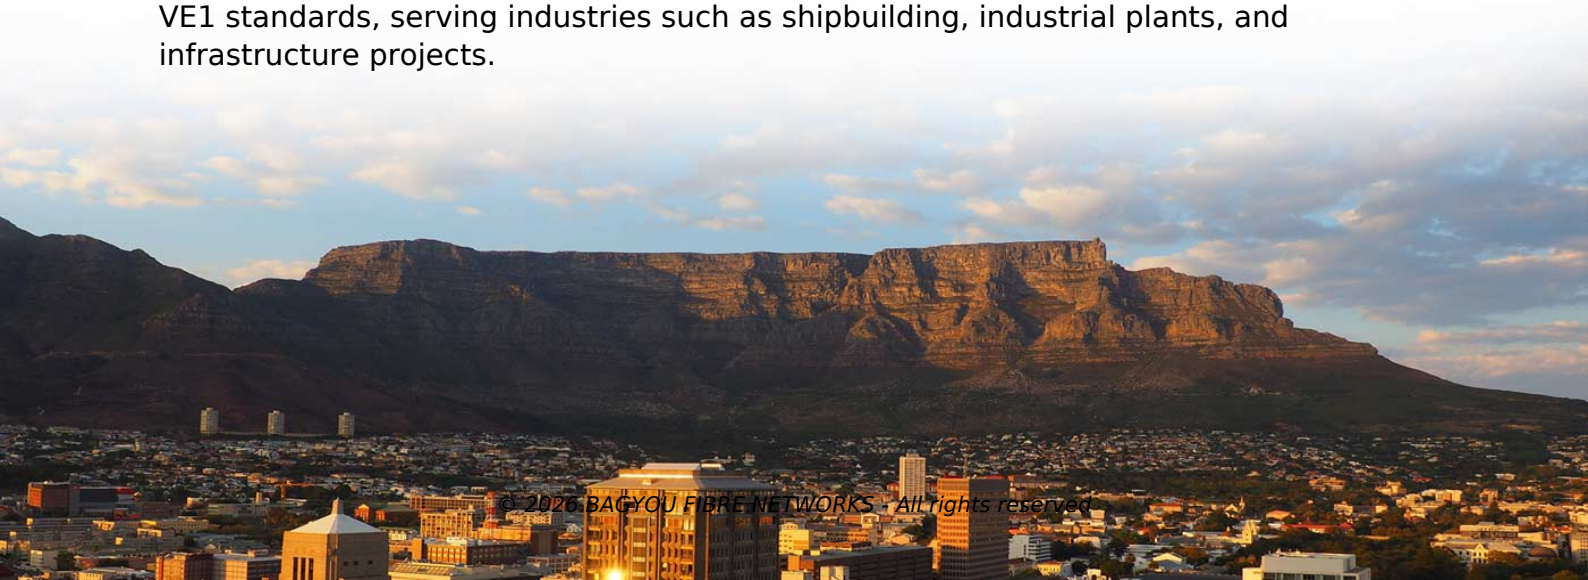

## Overview

These products are designed to carry heavier cable loads compared to the standard perforated cable trays. This product group offers easiness in vertical applications.

## Key Takeaways

Leading European ladder cable tray suppliers include DKC Europe, Niedax Group, Spina Group, Ebo Systems, Eaton, and Eurostrut, offering a wide range of materials, custom solutions, and compliance with European standards. Key Companies and OfferingsDKC Europe is a major European provider of cable tray systems, including ladder trays, offering solutions for civil and industrial infrastructures with a focus on energy protection, transport, and distribution systems. Niedax Group, headquartered in Germany, has over a century of experience and a product range exceeding 50,000 items, including steel, aluminium, PVC, and GRP cable trays and ladders.

They specialize in industrial, commercial, and infrastructure projects, providing durable and compliant solutions with technical consulting, planning, and installation support. Spina Group from Italy focuses on standard and custom cable tray systems, including ladder and perforated trays. Their products meet UNI EN 61537 and NEMA VE1 standards, serving industries such as shipbuilding, industrial plants, and infrastructure projects.

Ebo Systems specializes in Glass-fiber Reinforced Polyester (GRP) cable trays, offering high corrosion resistance, thermal stability, and mechanical strength. Their solutions are ideal for extreme environments and comply with EN and IEC standards. Eaton provides the B-Line series of cable management solutions, including metallic and non-metallic/fiberglass ladder trays, wire basket systems, and cable fixing solutions.

They support commercial and industrial applications with extensive CAD/BIM design resources. Eurostrut offers a wide range of cable support systems, including cable ladders, trays, protective tubes, and accessories. Their products are designed for utility construction, industry, marine, and offshore applications, emphasizing safety, durability, and custom solutions.

### Considerations for Selection

Material: Steel, aluminium, PVC, or GRP depending on environmental conditions and corrosion resistance requirements. Compliance: Ensure products meet European standards such as EN, IEC, or UNI EN 61537. Customization: Some companies provide tailored solutions for heavy-duty or extreme environments.

Support Services: Technical consulting, installation guidance, and project planning can be critical for large-scale or complex installations. These companies collectively cover a broad spectrum of ladder cable tray solutions across Europe, suitable for industrial, commercial, marine, and infrastructure projects.
