The electrical distribution box is located in a separate room

Overview

Bottom Line Up Front: Your home's distribution box (electrical panel) is typically located in the basement, garage, utility room, or mounted outside near your electrical meter. The National Electrical Code has a few restrictions on where electrical panels may be located, as follows: NEC 110. To find it quickly, look for a rectangular gray metal box about the size of a medicine cabinet, often positioned close to. For a three wire feed to a panel in a detached building, power supplied from a main panel in the house: This distribution panel is protected by a 40 amp breaker feeding this panel, located in the main panel in the house. No main breaker present in this distribution panel. This should be dry, easily accessible and sufficiently ventilated.
