VCI Coating Process for Electrical Cable Trays

Overview

Vappro 900''s clear VCI coating allows visual inspection of insulated parts. It provides excellent protection in harsh and corrosive environments such as acids, alkalines, saline solutions, and solvents.

Key Takeaways

VCI-coated cable trays provide superior corrosion protection for metal cable management systems in high-humidity, chemical, and marine environments. What is VCI Coating?

VC

I (Volatile Corrosion Inhibitor) coatings are specialized treatments applied to metal surfaces, including cable trays, to prevent corrosion. These coatings release vapor-phase inhibitors that form a protective molecular layer on the metal, shielding it from moisture, salts, and corrosive chemicals without affecting conductivity or paintability.

VC

I coatings can be water-based, oil-based, or thixotropic, depending on the application and environmental requirements. Benefits of VCI-Coated Cable TraysCorrosion Resistance: VCI coatings protect against rust and chemical erosion, extending the service life of cable trays in harsh environments such as basements, tunnels, mines, chemical plants, and coastal areas. Maintenance Reduction: The protective layer eliminates the need for frequent cleaning or degreasing, reducing maintenance costs.

Environmental Safety: Water-based VCI coatings minimize trade effluent discharge and are compatible with sensitive processes like painting or lithography. Versatility: Suitable for both ferrous and non-ferrous metals, VCI coatings can be applied to galvanized, steel, or bimetallic cable trays. ApplicationsVCI-coated cable trays are widely used in: Industrial Facilities: Chemical plants, oil and gas installations, and food processing plants where corrosive chemicals are present.

Marine and Coastal Areas: High salt content environments that accelerate metal corrosion. Power and Telecommunications: Power stations, substations, and data centers requiring long-term reliability. Storage and Transportation: Metal components in storage or shipping can be protected with VCI coatings to prevent rust during transit.

Types of VC

I CoatingsWater-Based VCI (e.g., VAPPRO 837): Colorless, non-oily, suitable for metals that require immediate use without cleaning.

Oil-

Based VC

I (e.g., VAPPRO 865, 868): Thixotropic, highly resistant to saltwater, ideal for outdoor, marine, or industrial applications.

Multi-

Purpose De-

Watering Fluids (e.g., VAPPRO 855): Provide temporary protection and act as mild lubricants for sheet metal or machinery. ConclusionVCI-coated cable trays are an effective solution for preventing corrosion in challenging environments, ensuring the safety and longevity of electrical circuits. Selecting the appropriate VCI type—water-based, oil-based, or thixotropic—depends on the specific environmental conditions, metal type, and operational requirements.

Article Content

The latest Technology for Surface Protection of Cable Tray-VCI ...

Under this background, the latest VCI bimetallic coating technology was born, which is especially suitable for long-term outdoor perforated cable tray, which can replace the hot-dip galvanizing

VCI Enhanced Cable Tray

VCI coating belongs to metal coating, and due to the innovative application of high-performance vapor phase corrosion inhibitor (VCI) technology, it provides long

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

VCI Coated Cable Tray Factory_Manufacture_Supplier

It presents first-rate corrosion safety with the aid of combining the benefits of bimetallic and VCI technology, making sure the security and sturdiness of

VCI Coatings, VCI corrosion protection, VCI Rust Prevention

Vappro 900''s clear VCI coating allows visual inspection of insulated parts. It provides excellent protection in harsh and corrosive environments such as acids, alkalines, saline solutions, and solvents.

Cable Trays Surface Treatment: Methods and Applications

The Cable Trays Surface Treatment is a crucial factor influencing their durability, corrosion resistance, and visual appeal. In this article, we''ll explore the most common surface

How to Choose the Surface Corrosion Protection for Cable Trays

By following the ISO 12944 standard, selecting appropriate surface treatments and coating systems for cable trays ensures enhanced durability and reliability, enabling them to perform

Cable Tray Technical Guide A practical guide to product selection and ...

In designing supports for a cable tray system, consideration should be given to the loads associated with future cable additions and any additional loading that may be applied to the cable tray system (e.g.,

CABLE TRAYS

There is a solution for each type of environment. This white paper compares the High Resistance (HR) and Hot-Dip Galvanising (HDG) solutions and highlights the new High Resistance range, ZnAl

Products

Click on the links below to access product descriptions and other information regarding various VpCI® (Vapor phase Corrosion Inhibitor) and MCI® (Migrating Corrosion Inhibitor) product lines.

Technical Data

VCI Coatings vapor phase corrosion inhibitor (VCI) is added to Part A in an amount that when combined with Part B the applied dry film solids will contain 2.5 Wt. % of VCI solids. PRINCIPAL

Volatile Corrosion Inhibitor (VCI) and Vapor Corrosion Inhibitor

© 2026 BAGYOU FIBRE NETWORKS - All rights reserved

Volatile Corrosion Inhibitor, Vapor Corrosion Inhibitor - Daubert Cromwell knows how VCI products work. Contact 1-800-535-3535 to take advantage of our expertise in volatile corrosion inhibitors.

Vci Trough Hot-Dip Galvanized Cable Tray

The VCI coating technology itself also finds broad applications beyond cable trays—such as in the automotive, aerospace, and other industrial sectors.

Vci Enhanced Cable Tray Tray

Vci Enhanced Cable Tray Tray Shandong Bolt Electrical Equipment Co., Ltd. will give you a detailed introduction to the content of Vci Enhanced Cable Tray Tray,

Materials Used & Finishing Of A Cable Tray

There are many types of materials and finishings used to manufacture a Cable Tray. Hutaib Electricals, Cable Tray Manufacturer in India offers a wide range of cable trays in India. Today Cable

What is Cable Tray Finishes and Their Applications

Discover cable tray finishes like galvanized coatings, powder coating, and stainless steel, designed to protect against corrosion and enhance performance.

GI Cable Trays – What it is, Types and Applications

GI cable trays play a significant role in the organisation and structure of electrical wiring for industrial, commercial, and infrastructure projects. Their strength, value for money, and advanced

Proper Galvanization In Cable Tray Manufacturing and Installation

The Galvanization of Cable Tray has to undergo a thorough process, which includes a proper treatment of cable trays.

Protection of Equipment for Storage and Transport with VCI

The paper includes laboratory testing data and application methods of shrink film, impregnated foams and coatings containing vapor corrosion inhibitor (VCI) that are being applied in conservation
