Factors Affecting Price

Fiber Count: More strands increase cost; a 2-core cable is cheaper than a 24-core or 96-core cable. Cable Type: Single-mode fiber is generally cheaper per meter than multimode fiber, but multimode may be required for high-speed data centers. Construction and Jacket Material: Indoor PVC or LSZH jackets are cheaper, while outdoor PE jackets, UV-resistant, or armored cables cost more.

Installation Considerations: Underground or direct-burial cables are more expensive than aerial or indoor runs. Brand and Quality: Premium glass (e.g., Corning) costs more but offers lower attenuation over long distances.

Practical Notes

Bulk Purchases: Wholesale or bulk orders can reduce the per-meter cost significantly, sometimes down to $0. 09 – $1. 52 per foot (~$0.

30 – $5 per meter) depending on specifications. Special Features: Pre-terminated cables, armored protection, or LSZH jackets increase cost but improve durability and safety. Market Variability: Prices fluctuate based on supplier, location, and current market conditions, so comparing quotes is recommended.

In summary, for standard optical fiber cables, expect $0. 05–$0. 60 per meter for typical indoor/outdoor cables, while specialty or high-count armored cables can cost up to $6 per meter depending on specifications and environmental requirements.
