52 per foot, with simple 1-core FTTH drop cables around $0. 13 per foot and high-count backbone cables (e.g., 288 strands) reaching $6 per foot or more. Single-mode fiber is generally cheaper per foot than multimode fiber, but equipment costs may be higher.

Armored or plenum-rated cables for harsh environments or indoor air-handling spaces are more expensive.

Additional Considerations

Prices vary based on installation type (indoor, outdoor, aerial, or underground) and whether the purchase includes pre-terminated assemblies or patch cables. For large-scale projects, consulting suppliers directly can provide custom quotes and bulk discounts. By checking these sources, you can compare prices for different fiber types, lengths, and configurations to find the best option for your project.
